7:30pm California's Gold - Historic Chickens

A 1916 brochure called the town of Petaluma "The largest poultry center in the world" and up until the sixties, Petaluma was a major player in the world of chickens. In 1915, Petaluma shipped 11,681,134 dozen eggs. Huell travels to Petaluma to attend the annual Butter and Egg Days celebration, which ran from 1916 to 1928 and was brought back in the early eighties. Petaluma pulls out all the stops in this wonderful small town gathering. You won't want to miss the Cutest Chick costume contest. Continuing our look at Historic Chickens, the Petaluma Historical Society takes Huell to one of original chicken farms that once lined the hills of this town. Beautiful moss covered chicken coups are slowly decaying, but are an integral part of Petaluma's landscape. Several of the original farmers come back to spend a day reminiscing about their lives on these farms. Some of these folks come from a long line of farmers who have called Petaluma home for many generations. (Next Air 04/23/14 07:30pm)

8:00pm Story of the Jews with Simon Schama - A Leap of Faith

Simon Schama explores the bright, hopeful moment when Enlightenment thinkers and revolutionary armies brought ghetto walls crashing down - allowing Jews to weave their wisdom, creativity and energies into the very fabric of modern life in Europe. One of the most fruitful branches of this Jewish renaissance was in music, and the stellar careers of Giacomo Meyerbeer and Felix Mendelssohn established the enduring tradition for Jewish musical prodigies. However, the remarkably successful integration of Jewish talent into the mainstream of European culture and commerce stirred up the ghosts of ancient prejudice, decked out in the new clothes of romantic nationalism and the pseudo-science of anti-semitism. The road to the hell of the Holocaust was paved by the diatribes of Richard Wagner, while the trial of Alfred Dreyfus led Theodor Herzl to conclude that without a homeland of their own, Jews would never be free of the millennia-old persecution.

9:00pm Story of the Jews with Simon Schama - Over The Rainbow

Simon Schama plunges viewers into the lost world of the shtetl, the Jewish towns and villages sewn across the hinterlands of Eastern Europe, which became the seedbed of a uniquely Jewish culture. Shtetl culture would make its mark on the modern world, from the revolutionary politics of the Soviet Union to the mass culture of Tin Pan Alley and Hollywood. It was also the birthplaces of Hasidism, the most visible, iconic and, arguably, most misunderstood expression of Jewish faith and fervor. This episode travels from the forests of Lithuania, where Schama's own family logged wood and fought wolves, to the boulevards of Odessa, where shtetl kids argued the merits of revolutionary socialism over Zionism. From the Ukrainian city of Uman, where today thousands of the Hasidim chant and sing over the tomb of the wonder-working Rabbi Nachman, to the streets of Manhattan's lower east side, where the sons of shtetl immigrants wrote the American songbook. The program returns, with grim inevitability, to Eastern Europe in 1940, where the genocidal mechanisms of the "final solution" were beginning to grind the shtetl world into dust and ash.

10:00pm Story of the Jews with Simon Schama - Return

Simon Schama examines how the Holocaust and the creation of Israel have fundamentally changed what it means to be Jewish. Mixing personal recollection with epic history, Schama tells the story of the remarkable personalities and unprecedented events that turned the Zionist dream of creating a modern state of Israel into reality - and the consequences for the world. With contributions from writer David Grossman, photographer Micha Bar-Am, kibbutz founder Freddie Kahan, West Bank settler Zvi Cooper and Palestinian villager Yacoub Odeh, the film explores the tension between the high ideals and dire necessities that led to the creation of a Jewish homeland and the realities of conflict, dispossession and occupation that have followed in its wake.

7:30pm California's Gold - Monarchs

Have you ever wondered what 100,000 Monarch Butterflies look like? Well here's your chance. Huell travels to Pismo State Beach to visit the largest overwintering site for Monarch butterflies in the U.S. More people visit this site than any another butterfly site in the world. Last year they had 50,000 visitors! Every year hundreds of thousands of Monarchs fly as much as two thousand miles to reach safe overwintering sites along California's central coast. They can fly up to one hundred miles a day at an altitude of up to ten thousand feet. What's amazing is that none of the butterflies that make this amazing journey have ever been here before. The butterflies have nothing but instinct to guide them. Huell gets a special tour of this wonderful site from a Park Ranger, docents and a class from Cal Poly who studies the Monarchs. It's a feast for the eyes. (Next Air 04/30/14 07:30pm)

8:00pm Nature - White Falcon, White Wolf

On Canada's remote Ellesmere Island, where June is spring, July is summer and August is already autumn, the race is on for two remarkable species to raise their families. The white gyr falcon is enormous, the largest and most powerful falcon in the world. Yet last summer, the nesting falcon pair here failed to raise any young. The rare Arctic wolves rely on every member of the pack to chase and bring down the prey that keeps them alive. Last year was good to them, and they raised three cubs. But for the wolves and the falcons, as well for as the snowy owls, musk oxen, lemmings, Arctic foxes and hares who share this fragile ecosystem with them, fortunes are always precarious.

9:00pm Nova - Wild Predator Invasion

Over the last few centuries we have shot, trapped and skinned the predators that formerly thrived at the top of the food chain in the wild. Wild bears, wolves and big cats are all in retreat, and a growing number of scientists are discovering that by eliminating predators, we have changed the environment. Removing predators from the wild has thrown ecosystems off-kilter, triggering domino effects that scientists are just beginning to understand. In "Wild Predator Invasion," NOVA follows scientists who are trying out a simple but controversial solution: returning apex predators --like wolves, bears, and panthers -- to their natural environments. Can these newly reintroduced predators restore the natural balance of their ecosystems without threatening the humans who live among them?

10:00pm Secrets of the Dead - Carthage's Lost Warriors

Carthage, the proud capital of the vast Carthaginian Empire, is ablaze. Marauding Romans are mercilessly slaughtering and pillaging. Any survivors face a terrifying fate as slaves on Roman galleys or in their quarries. Escaping the bloody carnage is impossible... or is it? Could some of the once-mighty Carthaginians have got away? And even more incredibly -- could they have turned west on an epic journey across the vast Atlantic Ocean to new shores? Did they set foot in South America, long before Columbus ever walked the face of the Earth?

7:30pm California's Gold - Weedpatch

Many "Okies" fled the Dust Bowl in their jalopies with signs reading "California or Bust." Out of options, they often ended up at the " Weedpatch camp," a federal labor and living camp for migrant workers in Kern County. Huell visits this historic camp, later immortalized in John Steinbeck's "Grapes of Wrath," and talks with both the "Okies" who grew up there and the Latinos who now call it home.

Repeat of 03/16/14 01:30pm

We all have financial issues and problems. Suze Orman's latest special sharply focuses on her helping individual viewers "find financial solutions for you." As always, Suze's advice is based not just on numbers, but on a critical understanding of ourselves and our emotional needs. The special's central theme is that our financial decision-making should be guided by an understanding of "the goal of money." As Suze perceptively defines it: "The goal of money is to make you feel secure." Our financial solutions should work to fulfill that goal. In addition, Suze stresses the importance of making financial decisions that you feel comfortable with. Financial problems are caused when you do things with money that do not seem "right" to you, despite pressures and advice from others. (Next Air 04/06/14 08:00am)

7:00pm **Rebels On Lake Erie**

REBELS ON LAKE ERIE tells a story of intrigue, conspiracy and adventure, set against the backdrop of the Civil War. Virginia native John Yates Beall - a wealthy, college-educated Southern plantation owner - served in the Confederate army under the legendary General Stonewall Jackson. Wounded in battle, Beall continued to serve the cause as a privateer, attacking Union ships on Chesapeake Bay. Later, he would lead two ambitious (and ultimately unsuccessful) missions: to liberate the Confederate soldiers imprisoned on Johnson's Island Prisoner-of-War Depot near Sandusky, Ohio and to free captured Confederate officers by derailing a passenger train in Upstate New York. Three years in the making, REBELS ON LAKE ERIE recounts Beall's wartime exploits through interviews with Civil War authors, historians and scholars; photographs, maps and illustrations from libraries and archives across the U.S. and Canada; and period music from the Civil War era.

10:00pm Secrets of Selfridges

Two words are synonymous with the department store Selfridges: luxury and London. However, Selfridges was the brain child of an American, Mr. Harry Gordon Selfridge, whose life is depicted in the PBS Masterpiece series "Mr. Selfridge." The real, flamboyant Mr. Selfridge revolutionized the way that Londoners shopped by introducing a new American retail model that made shopping less of a practical pursuit and more of a luxurious adventure. Keen to put the shopper's experience above all else it was Selfridge who coined the phrase "the customer is always right," an expression that has become the mantra of retail stores all over the world. Today, Selfridges remains as much of an attraction as it was when it opened in 1909, and Selfridge's dream of creating a sophisticated and adventurous shopping experience is enjoyed by people from every corner of the world, 362 days a year. This program reveals the grandiose store's hidden stories and delves deep into the mind of its incredibly ambitious creator. (Next Air 04/07/14 02:00am)

7:30pm California's Gold - Hidden Alcatraz

Most of us have seen one of the countless films based on Alcatraz, from the Birdman to Clint Eastwood and his Escape From Alcatraz. Over a million people every year take the ferry through the thick San Francisco fog to walk the cell blocks that housed the likes of Machine Gun Kelley and Al Capone. As usual Huell wasn't satisfied with the regular tour and went in search of the "Hidden Alcatraz". It got it's name from the Spanish word Alcatrazes, or Bird Island and didn't see human inhabitants until the US Military took it over in the mid 1800s. During the Civil War it was used as a prison for Southern privateers. After the more modern prison was built in the 1930s , the old Civil War prison was covered over and virtually forgotten. Join Huell and Luis as they go under Alcatraz and discover the labyrinth of tunnels and caves that honeycomb "The Rock". The remnants of our state's rich history are finally uncovered in this very special tour. There is much more to Alcatraz than meets the eye.

8:00pm Nature - My Bionic Pet

The animals of the world may increasingly need our help with big issues like preserving habitat or species conservation. But sometimes individual animals need our help as well. Left disabled without fins, flippers, beaks or tails because of disease, accidents or even human cruelty, these unfortunate creatures need what amounts to a miracle if they are to survive. Luckily for them, sometimes miracles do happen. Amazing prosthetics made possible by the latest engineering and technology are able to provide just what they need. And scientists are finding that innovations created in the process are benefitting both animals and humans.

9:00pm Nova - Inside Animal Minds: Bird Genius

What would it be like to go inside the mind of an animal? We have all gazed into a creature's eyes and wondered: what is it thinking about? What does it really know? Now, the revolutionary science of animal cognition is revealing hard evidence about how animals understand the world around them, uncovering their remarkable problem-solving abilities and exploring the complexity of their powers of communication and even their emotions. In this mini-series, NOVA explores these breakthroughs through three iconic creatures: dogs, birds and dolphins. We'll travel into the spectacularly nuanced noses of dogs and wolves, and ask whether their reliance on different senses has shaped their evolution. We'll see through the eyes of a starling in flight and test the tool-using skills of the smartest of birds, the crow. We'll listen in as scientists track dolphins in the Caribbean and elephants on the African savannah, trying to unlock the secrets of animal communication. As we discover how researchers are pushing the animal mind to its limits, we'll uncover surprising similarities to -- and differences from -- the human mind. Today, researchers are discovering that some creatures have mastered skills purportedly restricted to humans. Many are bird brains. Meet a cockatoo with a talent for picking locks; a wild crow on a mission to solve an eight- step puzzle; and a tame raven who can solve a puzzle box so quickly that his performance has to be captured with high-speed photography. Are these skills really evidence of high intelligence or just parlor tricks, the result of training and instinct? To find out, NOVA tests the limits of some of the planet's brainiest animals, searching for the secrets of a problem-solving mind.

8:00pm This Old House Hour

Fence contractor Mark Bushway installs a custom PVC fence and arbor. Tile contractor Eric Ferrante creates a marble herringbone pattern in the powder room, while his brother Mark presents the grout color options for the faux slate floor in the mudroom. Tom builds a sliding barn door using salvaged antique wood from the attic. Horticulturist Laurie Sullivan presents alternatives to the usual, run-of-the-mill shade plants. In the second half of the hour, on ASK THIS OLD HOUSE, Tom and Kevin build a simple table from solid fir, and Kevin works with a wood-finishing expert to stain and finish it. Roger shows a homeowner how to get rid of tree stumps. And Richard discusses the state of solar energy. (Next Air 04/11/14 01:00am)

9:00pm Bletchley Circle

Susan tells the other women that she came face to face with the killer - and he let her go. It soon becomes apparent that he's becoming obsessed with her. Following the death of a former spy who had been helpful in identifying the perpetrator, the women consider whether to continue their pursuit, but they know if they don't find the killer, he'll move somewhere else and more girls will die. Their investigation resumes. Cleverly planting false clues, the murderer leads Susan into a trap. (Next Air 04/11/14 02:00am)

Repeat of 03/26/14 07:30pm

Huell visits with a group of bluebird enthusiasts. The Western Bluebird once flew across most of California and beyond, but now they are in dire need of our help. Huell joins up with Bob Franz and the Southern California Bluebird Club, who have been working with many other groups across our state to help bluebirds make a recovery. They suffer as much from habitat loss as they do from the introduction of non-native species. Huell takes a springtime tour of some of the nest-boxes filled with hatchlings as he learns about what has been and can be done to help these blue feathered friends that are part of California's Green!

10:00pm Bletchley Circle - Blood On Their Hands, Part 1

Alice Merren is in prison awaiting trial for the murder of her former Bletchley Park colleague. Jean, believing Alice is covering for someone, begins to reunite the circle to help establish the innocence of one of their own. The investigation leads to a young woman who seems to have had a relationship with the deceased and in whose home they find documents suggesting a military cover-up of a chemical spill. The women use the skills honed at Bletchley Park - and take dangerous chances - to try to exonerate Alice. Since Alice refuses to participate in her own defense, the women begin to investigate the murder. Clues found in the murdered man's house lead to Lizzie, a woman with whom he had a relationship. In Lizzie's apartment, the women find a classified military file and press clippings relating to a chemical spill. Eventually they track down Lizzie, who fears her life is in danger. Susan deduces why Alice is willing to face the death penalty.

7:30pm California's Gold - Blue Angels

They're one of the most famous air squadrons in the world -- serving as positive role models and goodwill ambassadors not only for our Navy, but for our country. We're talking about the Blue Angels who, since first formed in 1946, have been demonstrating their flying skills and maneuvers to literally millions of spectators each year. And for over 30 years the Blue Angels have been a part of "California's Gold." Since 1967 the squadron has spent the winter at Naval Air Facility, El Centro, training pilots and new crew members. The good weather and open spaces make this a perfect place to practice and, over the years, squadron members have become a welcome part of the community in Imperial County during their three months of intensive preparation for the 70 air shows they fly each season. On this particular adventure host Huell Howser accepts an invitation to spend a couple of days with the Blue Angels and ends up not only watching them train, but actually gets to go up with them in an F/A18 Hornet for the ride of a lifetime. Huell also meets former Blue Angel pilots who talk about the "good old days," and visits with local citizens who talk about the pride the community of El Centro feels in having the squadron there each winter. All in all, it's a fast-paced, high-powered, high altitude adventure in search of "California's Gold." (Next Air 04/28/14 07:30pm)

8:00pm Pioneers of Television - Standup to Sitcom

This star-packed episode features fresh interviews with Jerry Seinfeld, Roseanne Barr, Tim Allen, Ray Romano and Bob Newhart. The program reveals how America's top standup comics made the transition to the sitcom format and includes dozens of clips from "Seinfeld," "Home Improvement," "Everybody Loves Raymond," "Roseanne" and more.

9:00pm Address

This film showcases the Greenwood School in Putney, Vermont -- where students grappling with an array of learning challenges use the Gettysburg Address as a tool for success. Each student is tasked with memorizing Abraham Lincoln's 10-sentence masterpiece, and at year's end, recite it before their classmates and teachers. The film uses the contemporary story to reveal the history, context and importance of one of the greatest speeches in US history.

10:30pm Lincoln@Gettysburg

In 1863 Abraham Lincoln proved himself a master of a new frontier-not on the battlefields of the Civil War, but in his "high-tech" command center: the War Department Telegraph Office, America's first "Situation Room." The "Internet" of the 19th century, the telegraph gave Lincoln new powers to reshape leadership and wield personal control across distant battlefields. The results of Lincoln's pioneering experiment in electronic leadership led to the rebirth of America on the fields of Gettysburg... both in the battle that turned the tide of the Civil War, and in a few words that recast the American ideal as a national creed: the Gettysburg Address. LINCOLN@ GETTYSBURG will unfold the greatest turning point in American history: the rebirth of a nation and the dawn of the information age. (Next Air 04/16/14 03:30am)

11:30pm Ribbon of Sand

The famed Outer Banks of North Carolina are a slim and moving line of sand in the open Atlantic. Many travelers think they know these islands -- but south of Ocracoke Inlet there rises a luminous bar of sand 60 miles in extent, with no roads, no bridges, no hotels: the wild beaches of Cape Lookout, one of the few remaining natural barrier islands in the world. "Ribbon of Sand" examines this seascape and the transitory islands doomed to disappear. The film features quotes by environmental pioneer Rachel Carson as interpreted by actress Meryl Streep.

7:30pm California's Gold Flying Fish

Repeat of 03/31/14 07:30pm

Catalina has been famous for many things over the years, Glass BottomBoats, Buffalo and the Casino to name a few. But one of the strangest and most popular attractions has been the Flying Fish Boat Trip which has been transporting visitors on nighttime journeys to watch Catalina's flying fish since the turn of the century. In 1924 William Wrigley decided to build a boat just for Flying Fish Tours. The Blanche W. is a 64-foot long open-deck wooden boat named after Wrigley's granddaughter Blanche. The boat is still outfitted with its original pew-style mahogany benches, which seats 98 passengers. The boat cruises the islands coastline at night, attracting flying fish with two 40-million candle-power W.W.I spotlights. The spectacle of the fish leaping out of the water has been compared to giant silver dragonflies soaring over the ocean. Huell travels back to Catalina for a very special 75th anniversary cruise. William Wrigleys granddaughter Blanche (for whom the boat was named) comes back to the island and shares some wonderful stories with Huell. We'll even take a close up look at a flying fish and enjoy a wonderful night on the sea.

8:00pm Nature - Touching The Wild

Joe Hutto's idea of research is anything but normal, dedicating seven years of his life to becoming a wild mule deer. The herd would ordinarily run from any human but, incredibly, these keenly intelligent animals come to regard this stranger as one of their own. Accepted by the matriarch, he walks among them, is even groomed by them, and can lie with a pregnant doe talking to its unborn fawns. As he crosses the species divide, Joe is tapping into a new understanding about these elusive animals, literally entering a deer society. The captivating joy he feels for his new family is nothing short of infectious, but this human predator also learns to see the world from the point of view of prey -- and it's an experience that will ultimately rock him to his very core; sharing their world so personally finally takes a toll that sends him back to his own kind.

9:00pm Nova - Inside Animal Minds: Dogs & Super Senses

What would it be like to go inside the mind of an animal? We have all gazed into a creature's eyes and wondered: what is it thinking about? What does it really know? Now, the revolutionary science of animal cognition is revealing hard evidence about how animals understand the world around them, uncovering their remarkable problem-solving abilities and exploring the complexity of their powers of communication and even their emotions. In this mini-series, NOVA explores these breakthroughs through three iconic creatures: dogs, birds and dolphins. We'll travel into the spectacularly nuanced noses of dogs and wolves, and ask whether their reliance on different senses has shaped their evolution. We'll see through the eyes of a starling in flight and test the tool-using skills of the smartest of birds, the crow. We'll listen in as scientists track dolphins in the Caribbean and elephants on the African savannah, trying to unlock the secrets of animal communication. As we discover how researchers are pushing the animal mind to its limits, we'll uncover surprising similarities to -- and differences from -- the human mind. What is it like to be a dog, a shark or a bird? This question is now getting serious attention from scientists who study animal senses. Humans rely on smell, sight, taste, touch and sound; other animals have super-powered versions of these senses, and a few have extra senses we don't have at all. From a dog that seems to use smell to tell time to a dolphin that can "see" with its ears, discover how animals use their senses in ways we humans can barely imagine. But it's not just the senses that are remarkable - it's the brains that process them. NOVA goes into the minds of animals to "see" the world in an entirely new way.

10:00pm Your Inner Fish - Your Inner Reptile

A key moment in our evolutionary saga occurred 200 million years ago, when the ferocious reptile-like animals that roamed the Earth were in the process of evolving into shrew-like mammals. But our reptilian ancestors left their mark on many parts of the human body, including our skin, teeth and ears.

7:30pm California's Green - Santa Barbara Artists

Some people talk about the environment. Others actually do something proactive about it. Like the group of 26 Santa Barbara artists who founded the Outdoor Airing Club more than 20 years ago. The O.A.K. Group, as it is known, is made up of artists who paint magnificent, unspoiled open spaces threatened by development. They then sell these art pieces at a special auction with 50 percent of the profits going to organizations in Santa Barbara County working to preserve our precious and unfortunately disappearing open, natural, landscape. Huell spends a day with some O.A.K. Group members as they painted in three different spectacular locales, and then attends the auction several months later. The resulting episode of California's Green is not only beautiful, but inspirational as it shows how important a small but dedicated group of people who really care can be.

8:00pm This Old House Hour

Paul Grothouse installs a teak island top in the kitchen, while Jim Snyder installs a solid surface vanity top in the master bath. Designer Christine Tuttle reviews how the vision for the house evolved from fabric, paint and light fixture choices. Tom builds a small but handy electronics nook. Tile contractor Mark Ferrante grouts the pebble tiles on the shower floor. Wallpaper hanger Warren Reeb hangs handmade wallpaper. Norm and Tom install a new front door. In the second half of the hour, on a special episode of ASK THIS OLD HOUSE, the guys make several important improvements. Kevin helps make a home accessible for a homeowner in a wheelchair by modifying a bathroom and several different sets of stairs. Tom and Kevin rebuild a dangerous staircase for a survivor of the Boston Marathon bombing.

7:00pm Lawrence Welk Show - Easter

Host: Mary Lou Metzger. This show from 1979 opens with "Easter Parade" as pretty girls in gay nineties finery stroll on a flower- bedecked set with their handsome escorts. Guy & Ralna sing "Give Me That Old Time Religion", Sandi, Gail, & Mary Lou "Tiptoe Through The Tulips", and Myron Floren does a thrilling version of "The Lost Chord". Henry Cuesta plays a tender "Love Lifted Me" and the whole cast sings a group of beloved hymns at the close? a truly lovely show.

8:00pm Elderly Instruments: All Things Strings

Loved around the world as a source for the best in stringed instruments, Lansing Michigan's Elderly Instruments is All Things Strings. Musicians from Elvis Costello, Vince Gill, REM, and REO to the local beginner seek out the Washington Street store either online or in person. There you encounter the best in musical instruments and a staff of terrific musicians who welcome you as if you had "walked into their living room." "It's the guitar center of the universe", and "anyone and their brother" can pick up an expensive instrument and play it. No glass cases, no one looming over our shoulder, and you don't need to ask - just pick it up and play. All Things Strings is wall to wall music, from folk to rock to bluegrass to country and western. The camera takes you behind the scenes with the quirky and knowledgeable staff, into workshops with guest musicians, and into the funky office and mind of Stan Werbin, co-founder and owner, and the source of the spirit and magic of Elderly.

9:00pm Well Read - Nathaniel Philbrick, Bunker Hill

The first major battle of the Revolutionary War was a bloody win for the British but a harbinger of ultimate victory for the American colonies.

9:30pm Lincoln@Gettysburg

Repeat of 04/18/14 03:00am

In 1863 Abraham Lincoln proved himself a master of a new frontier-not on the battlefields of the Civil War, but in his "high-tech" command center: the War Department Telegraph Office, America's first "Situation Room." The "Internet" of the 19th century, the telegraph gave Lincoln new powers to reshape leadership and wield personal control across distant battlefields. The results of Lincoln's pioneering experiment in electronic leadership led to the rebirth of America on the fields of Gettysburg... both in the battle that turned the tide of the Civil War, and in a few words that recast the American ideal as a national creed: the Gettysburg Address. LINCOLN@ GETTYSBURG will unfold the greatest turning point in American history: the rebirth of a nation and the dawn of the information age. (Next Air 04/22/14 02:00am)

7:00pm California's Gold - In-N-Out Burger

In this hour-long California's Gold Special, Huell Howser looks at the history of In-N-Out Burger. This is the first time television cameras have ever been allowed to shoot inside a store. And this special also includes an exclusive behind-the-scenes tour of the In-N-Out Headquarters in Baldwin Park where it all started back in 1948.

8:00pm Call The Midwife

Jenny's patient Leah is struggling to cope with her mother's agoraphobia, as well as her own pregnancy. When her husband is offered a new job and home, Leah knows she can't leave her mother behind after all they went through to survive the Holocaust. With the arrival of new life, Mrs. Rubin seems reborn, too; with great effort and help from Sister Winifred, she manages to step outside for the first time in 12 years. Alec asks Jenny to go to Brighton for the weekend, but she questions his intentions. Later, he's seriously injured in an accident on the building site that he's been overseeing. When she learns that he has taken a turn for the worse, Jenny leaves immediately for the hospital. Shelagh takes over the local choir and helps bring it back to life.

Miss Mardle houses a handsome refugee, Thackeray spies on LeClair and Harry has a showdown at cards with Loxley.

10:00pm Bletchley Circle - Blood On Their Hands, Part 2

Alice Merren is in prison awaiting trial for the murder of her former Bletchley Park colleague. Jean, believing Alice is covering for someone, begins to reunite the circle to help establish the innocence of one of their own. The investigation leads to a young woman who seems to have had a relationship with the deceased and in whose home they find documents suggesting a military cover-up of a chemical spill. The women use the skills honed at Bletchley Park - and take dangerous chances - to try to exonerate Alice. Alice is facing the gallows - it's a race against time to prove her innocence and save her life. Through a search of documents and confidential police information, the women believe the murder was part of a wider military cover-up. When Susan gains entry to a military hospital, she learns the truth. Meanwhile, the other women's lives are in danger.

7:30pm California's Gold - China Clipper

They were huge flying boats named after the great sailing ships that in the 1800's sailed the oceans of the world. The luxurious Pan American "Clipper" planes of the 1930's took cargo, mail and passengers around the world in what was, for its time, considered a daring and pioneering feat. Pan American's Treasure Island terminal and lagoon became the home port for the Clipper's Pacific operations -- connecting the United States with the Far East by air. Starting in the mid-1930s, and lasting for only five years, residents of the Bay Area were treated to the sights and sounds of these huge boat planes taking off and heading out over the Pacific. Recently in a very special episode of "California's Gold," history repeated itself as, once again, a boat plane landed on the Bay, taxied up to a docking area near Treasure Island, took on passengers and flew out over the city. This episode is a tribute to the "China Clipper" and its California connection. The original Terminal building on Treasure Island is the stage where former Pan American pilots and crew members who actually flew the Clipper, gather once more for conversation and reminiscing. Producer/host, Huell Howser experiences his high point when he climbs aboard one of these historic boat planes with two former crew members for a short, exciting flight around the Bay area. The days of the Clipper are gone forever, replaced decades ago by long-range jets. But for a few hours on a beautiful spring afternoon, some of the glory days of the great Clipper ships, and the people who made those days happen, returned to Treasure Island. It's a look back at a glorious part of our aviation history as we take to the air in search of "California's Clipper Gold".

8:00pm Pioneers of Television - Doctors and Nurses

From George Clooney on "ER" to Richard Chamberlain on "Dr. Kildare," television's long love affair with doctors and nurses shows no signs of letting up. Noah Wyle, Anthony Edwards, Gloria Reuben and Eriq LaSalle open up about the secrets of "ER"; Howie Mandel, Ed Begley Jr. and Christina Pickles revisit "St. Elsewhere." The episode also features the final interview with Chad Everett of "Medical Center" before his recent death.

9:00pm American Masters - A Fierce Green Fire

This film is an exploration of the environmental movement -- grassroots and global activism spanning 50 years from conservation to climate change. Inspired by the book of the same name by Philip Shabecoff and informed by advisors like Edward O. Wilson, A FIERCE GREEN FIRE chronicles the largest movement of the 20th century and one of the keys to the 21st. It brings together all the major parts of environmentalism and connects them. It focuses on activism, people fighting to save their homes, their lives, the future -- and succeeding against all odds. The film is directed and written by Mark Kitchell, Academy Award-nominated director of Berkeley in the Sixties, and narrated by Robert Redford, Ashley Judd, Van Jones, Isabel Allende and Meryl Streep.

10:00pm Frontline - Solitary Nation

An estimated 80,000 Americans are in solitary confinement - even people who haven't committed violent crimes - sometimes for years, or even decades. Using extraordinary access to the segregation unit at the maximum security Maine State Prison, FRONTLINE examines America's use of solitary confinement - a practice U.S. prisons and jails resort to more than most other countries. Some prison officials see it as necessary to keep order and safety, but critics say it is inhumane and counterproductive. "Solitary Nation" is an extraordinarily rare and intimate view of life in solitary, through the stories of inmates living in isolation, the prison officers who keep them locked in, and a new warden who is re-thinking the practice and trying to reduce the number of inmates in solitary. Historic Chickens**

Repeat of 04/01/14 07:30pm

A 1916 brochure called the town of Petaluma "The largest poultry center in the world" and up until the sixties, Petaluma was a major player in the world of chickens. In 1915, Petaluma shipped 11,681,134 dozen eggs. Huell travels to Petaluma to attend the annual Butter and Egg Days celebration, which ran from 1916 to 1928 and was brought back in the early eighties. Petaluma pulls out all the stops in this wonderful small town gathering. You won't want to miss the Cutest Chick costume contest. Continuing our look at Historic Chickens, the Petaluma Historical Society takes Huell to one of original chicken farms that once lined the hills of this town. Beautiful moss covered chicken coups are slowly decaying, but are an integral part of Petaluma's landscape. Several of the original farmers come back to spend a day reminiscing about their lives on these farms. Some of these folks come from a long line of farmers who have called Petaluma home for many generations.

8:00pm Nature - Snow Monkeys

In the frigid valleys of Japan's Shiga Highlands, a troop of snow monkeys make their way and raise their families in a complex society of rank and privilege where each knows their place. Their leader is still new to the job and something of a solitary grouch. But one little monkey, innocently unaware of his own lowly social rank, reaches out to this lonely leader, forming a bond with him that manages over time to warm his less than sunny disposition. It is a rare and remarkable gesture that alters both their lives. Changing seasons bring new babies to care for, a profusion of insects and blossoms to eat, family disagreements to squabble over and tragedies to overcome. Mating season brings competition for females as the days grow shorter and colder in a rush toward winter. But with their now confident leader to guide them and their families to shelter and care for them, this troop of snow monkeys is ready to face the world.

9:00pm Nova - Inside Animal Minds: Who's The Smartest?

What would it be like to go inside the mind of an animal? We have all gazed into a creature's eyes and wondered: what is it thinking about? What does it really know? Now, the revolutionary science of animal cognition is revealing hard evidence about how animals understand the world around them, uncovering their remarkable problem-solving abilities and exploring the complexity of their powers of communication and even their emotions. In this mini-series, NOVA explores these breakthroughs through three iconic creatures: dogs, birds and dolphins. We'll travel into the spectacularly nuanced noses of dogs and wolves, and ask whether their reliance on different senses has shaped their evolution. We'll see through the eyes of a starling in flight and test the tool-using skills of the smartest of birds, the crow. We'll listen in as scientists track dolphins in the Caribbean and elephants on the African savannah, trying to unlock the secrets of animal communication. As we discover how researchers are pushing the animal mind to its limits, we'll uncover surprising similarities to -- and differences from -- the human mind. What makes an animal smart? Many scientists believe the secret lies in relationships. Throughout the animal kingdom, some of the cleverest creatures - including humans - seem to be those who live in complex social groups, like dolphins, elephants and apes. Could the skills required to keep track of friend and foe make animals smarter? To find out, NOVA goes inside the social lives of some of the smartest animals on the planet.

9:00pm Great Performances - Matthew Bourne's Sleeping Beauty

Choreographer Matthew Bourne's *Sleeping Beauty* marks the choreographer's return to the music of Tchaikovsky to complete his acclaimed reinterpretations of the composer's trio of masterworks that began in 1992 with *Nutcracker!* and, most famously, in 1995 with the international success, *Swan Lake*, featuring a cast of all-male swans. This timeless fairy tale about a princess cursed to sleep for 100 years was adapted into a beloved ballet by Tchaikovsky and choreographer Marius Petipa in 1890. In a highly theatrical production that is not your grandfather's *Sleeping Beauty*, Bourne takes this date as his starting point, setting the story at the height of the fin de siècle epoch when fairies, vampires and a decadent opulence fed the gothic imagination. As the heroine Aurora matures into a young woman, the period shifts to the rigid confines of the Edwardian era. Decades later, awakening from her century-long slumber, Aurora finds herself in the modern day -- a world she finds more mysterious and wonderful than any fairy tale. Bourne's haunting new scenario is a romance for all ages; the traditional tale of good vs. evil and rebirth is turned upside-down, resulting in a supernatural love story across the decades, one that even the passage of time cannot erase.

Huell gets special permission from The Hollywood Sign Trust to actually climb up to and even sit on the sign. While perched on this landmark Huell learns the full history from 1923 till now from the people who work so hard to preserve this icon. Then he is joined by Raiden Peterson, who was part of the construction crew that literally rebuilt the sign in 1978. Raiden not only brings great memories and stories but an incredible bunch of artifacts that he found when working on the sign... including a lightbulb that still works! Finally Huell talks to a few pranksters, one of whom was part of a group that changed the sign to read CAL TECH, and another is the infamous RAFFEYSOD. As always you're invited to come on along as we learn how they did it!

Blue Angels**

Repeat of 04/15/14 07:30pm

They're one of the most famous air squadrons in the world -- serving as positive role models and goodwill ambassadors not only for our Navy, but for our country. We're talking about the Blue Angels who, since first formed in 1946, have been demonstrating their flying skills and maneuvers to literally millions of spectators each year. And for over 30 years the Blue Angels have been a part of "California's Gold." Since 1967 the squadron has spent the winter at Naval Air Facility, El Centro, training pilots and new crew members. The good weather and open spaces make this a perfect place to practice and, over the years, squadron members have become a welcome part of the community in Imperial County during their three months of intensive preparation for the 70 air shows they fly each season. On this particular adventure host Huell Howser accepts an invitation to spend a couple of days with the Blue Angels and ends up not only watching them train, but actually gets to go up with them in an F/A18 Hornet for the ride of a lifetime. Huell also meets former Blue Angel pilots who talk about the "good old days," and visits with local citizens who talk about the pride the community of El Centro feels in having the squadron there each winter. All in all, it's a fast-paced, high-powered, high altitude adventure in search of "California's Gold."

8:00pm Antiques Roadshow - Anaheim, Hour Two

ANTIQUES ROADSHOW travels to Anaheim, California, where host Mark L. Walberg and appraiser Richard Johnston head to Rickenbacker International Corporation to discuss vintage electric guitars. Highlights include two pairs of performance shoes that belonged to "The Beverly Hillbillies" star Buddy Ebsen; a jade jewelry collection that includes a necklace, ring and earrings, appraised for \$30,000 to \$36,000; and an oil painting titled Sacre-Couer et Moulin, by French artist Maurice Utrillo, valued at \$80,000 to \$120,000.

9:00pm Antiques Roadshow - Minneapolis, Mn - Hour Two

Host Mark L. Walberg and appraiser Phil Weiss are surrounded by military aviation memorabilia for a discussion of animation propaganda produced by Disney Studios during World War II. Highlights include a 1956 Elvis Presley standee rescued from an attic; a portrait sketched by George Gershwin accompanied with letters from the composer to the owner's mother; and a circa 1885 Franz Roubaud oil painting, valued at \$100,000.

10:00pm Independent Lens - Revenge of the Electric Car

In 2006, thousands of new electric cars were purposely destroyed by the same auto companies that built them. Today, fewer than six years later, the electric car is back...with a vengeance. Director Chris Paine takes his film crew behind the closed doors of Nissan, GM and the Silicon Valley start-up Tesla Motors to chronicle the story of the global resurgence of electric cars. Without using a single drop of foreign oil, this new generation of car is America's future: fast, furious and cleaner than ever. This program follows the race among major car-makers to be the first, the best and to win the hearts and minds of the public around the world. It's not just the next generation of green cars that's on the line; it's the future of the automobile itself (Next Air 04/30/14 04:30am)

11:30pm Sky Island

Repeat of 03/30/14 03:30am

In Northern New Mexico a range of mountains rises up from the high desert, a wild, rugged land of the Faraway Nearby. The volcanic Jemez Mountains are isolated from all other ranges -- an island in the sky, surrounded by a desert sea. In "Sky Island," filmmaker John Grabowska profiles this enchanting landscape and our place within it, with climate change effects already dramatically altering the desert and alpine ecosystems. The film features narration by Pulitzer Prize winner N. Scott Momaday and actress Meryl Streep. (Next Air 05/04/14 04:30am)

7:30pm California's Gold - Shasta Dam

When most people think of Shasta Lake, they imagine themselves on a houseboat enjoying California's largest manmade reservoir. With 365 miles of shoreline it is a boaters paradise. What most people don't think about is the massive structure that is responsible for holding back the water that creates Shasta Lake. We're talking about Shasta Dam which, is a perfect example of "California's Gold". Construction of the dam started in 1938 and ended in 1945. It's 602 feet high, 883 feet thick at the bottom, 30 feet thick at the top, and 3,460 feet long. The face of the dam is as big as six football fields and the spillway is the largest manmade waterfall in the world - three times the height of Niagara Falls. There are 18 outlets on the face of the dam, each big enough to drive a pickup through. Shasta Dam has the second largest mass of any dam in the United States. In this adventure, Huell and Luis get a behind the scenes look at this engineering marvel. Miles of tunnels and millions of gallons of water make for an exciting day, but there is another aspect to the Shasta Dam - the human element. It is the people who built the dam, the people that poured concrete 24 hours a day for 5 1/2 years and the countless other jobs that make this structure such a gem. Huell meets several of the original dam workers and listens to their stories about the glory days of Shasta Dam.

8:00pm Pioneers of Television - Breaking Barriers

This episode traces the story of people of color on American television - including the mid-1960s breakthroughs of African Americans Diahann Carroll ("Julia") and Bill Cosby ("I Spy"). Latino landmarks range from "I Love Lucy" with Desi Arnaz to "Miami Vice" with Edward James Olmos. Also featured are Asian-Americans like George Takei ("Star Trek"), who details his youth spent in a Japanese internment camp.

9:00pm Ruben Salazar: Man in the Middle - A Voces Special

"Ruben Salazar: Man in the Middle" provides insights and answers to one of the most bizarre, disturbing and controversial fatal shootings of the mid-20th century. Part political expose, part narrative deconstruction, part poetic meditation, the film is an independent and thorough investigation of the life and death of Ruben Salazar, a prominent Civil Rights era journalist. As it sheds light on Salazar's slaying by a Sheriff's deputy in 1970, it extricates him from the myths that were constructed to suit political agendas. It also offers a compelling look at an historical period that still resonates today -- an era of repressive law enforcement and of a people's turbulent search for recognition as full-fledged Americans.

10:00pm Frontline - Prison State

With unprecedented access, FRONTLINE investigates the impact of mass incarceration in America, focusing on a troubled housing project in Louisville, Kentucky, and a statewide effort to reverse the trend. There are some 2.3 million people behind bars in the U.S. today, but a disproportionate number come from a few city neighborhoods, and in some places the concentration is so dense that states are spending millions of dollars a year to lock up residents of single blocks. "Prison State" examines one community, Louisville's Beecher Terrace housing project, and follows the lives of four residents as they move in and out of custody, while Kentucky tries break that cycle and shrink its prison state. (Next Air 04/30/14 03:00am)

11:30pm California's Green - Vegetable Oil Car

Joel Wolf is an innovator. He has created a conversion system that allows his car to run on discarded cooking oil from local restaurants near his home in Ojai. Huell visits with Joel and learns, step by step, about this process.

7:30pm California's Gold Monarchs

Repeat of 04/02/14 07:30pm

Have you ever wondered what 100,000 Monarch Butterflies look like? Well here's your chance. Huell travels to Pismo State Beach to visit the largest overwintering site for Monarch butterflies in the U.S. More people visit this site than any another butterfly site in the world. Last year they had 50,000 visitors! Every year hundreds of thousands of Monarchs fly as much as two thousand miles to reach safe overwintering sites along California's central coast. They can fly up to one hundred miles a day at an altitude of up to ten thousand feet. What's amazing is that none of the butterflies that make this amazing journey have ever been here before. The butterflies have nothing but instinct to guide them. Huell gets a special tour of this wonderful site from a Park Ranger, docents and a class from Cal Poly who studies the Monarchs. It's a feast for the eyes.

8:00pm Nature - Love in the Animal Kingdom

Animals dance, sing, flirt and compete with everything they've got to find and secure a mate. For many, the all-important bonds they share as a couple are what enable the next generation to survive. But can we call these bonds love? In this look at the love life of animals, we see the feminine wiles of a young gorilla, the search for Mr. Right among a thousand flamingos, the open "marriages" of blue-footed boobies, the soap opera arrangements of gibbons, and all the subtle, outrageous, romantic antics that go into finding a partner. These are love stories all right, as various and intriguing as the lovers themselves.

9:00pm Nova - The Incredible Journey of the Butterflies

Every year, 100 million monarch butterflies set off on an incredible journey across North America. These beautiful creatures fly 2,000 miles to reach their remote destination: a tiny area high in the mountains of Mexico. Yet scientists are still puzzling over how the butterflies achieve this tremendous feat of endurance - and how, year after year, the monarchs navigate with such hair's-breadth precision. NOVA flies along with the monarchs, visiting the spectacular locations they call home and meeting the dangers they encounter along the way. As this program reveals, the monarch is a scientific marvel locked in an inspiring struggle for survival.

10:00pm Nazi Mega Weapons - Super Tanks

In the quest for world domination, the Nazis built some of the biggest and deadliest pieces of military hardware and malevolent technology in history. With brilliant, dark minds and a legion of slave labor at their disposal, the Nazis believed the path to ultimate victory was to out-build and out-engineer their enemies. To them, bigger definitely meant better, and better meant more lethal. As Hitler's grip on Europe tightened, he ordered men like Wernher von Braun, Ferdinand Porsche and Alfred Krupp to build increasingly outlandish machines and structures to realize his master plan. Creating huge terror machines, hi-tech superguns and some of the original weapons of mass destruction to control a nation, conquer a continent and win the war. This is World War II told from a new perspective. The series uncovers the engineering secrets of six iconic mega-structures, tells the stories of the evil geniuses that designed them and reveals how these structures sparked a technological revolution that changed warfare forever.
