Recorded in May 2010, this special offers emotion-packed performances from iconic voices singing songs that have remained popular for over forty years. Highlights: For the first time in four decades, pop-rock royalty Ronnie Spector is able to sing on TV the biggest hits from her days as the star of The Ronettes: "Be My Baby" and "Baby I Love You." History is also made when La La Brooks performs "Da Doo Ron Ron (When He Walked Me Home)" and "Then He Kissed Me," two girl group classics from The Crystals and songs on which Brooks sang lead vocals on the original recordings. The beloved Jay Black, formerly of Jay & The Americans, renders his show-stopping smash "Cara Mia" and Len Barry makes a rare appearance to offer his #1 hit "1-2-3." The Orlons hit the stage with "The Wah-Watusi" in tribute to the Philly teen dance music of American Bandstand era in the early 1960s. "This show is also unique in that we've been able to acquire lost footage from archives around the world that hasn't been seen since originally aired," says My Music creator and executive producer TJ Lubinsky. "Included are anthems like 'Get A Job' by the Silhouettes and 'Book Of Love' by The Monotones." Also featured is an original performance by Johnny Maestro & The Crests (before Maestro formed The Brooklyn Bridge). "Johnny was an all-time legend of vocal group harmony," said Lubinsky. "After his recent passing, seeing him in his prime is a highly poignant moment." (Next Air 08/03/14 12:00am)

8:00pm Brainchange with David Perlmutter, Md

Repeat of 08/03/14 12:00pm

BrainChange reveals the devastating truth about the effects of wheat, sugar, and carbohydrates on the human brain, with a 30-day plan to achieve optimum health. Renowned neurologist David Perlmutter, MD, blows the lid off a topic that's been buried in medical literature for far too long: carbs are destroying your brain. And not just unhealthy carbs, but even healthy ones like whole grains can cause dementia, ADHD, anxiety, chronic headaches, depression, and much more. His New York Times #1 best-selling book, Grain Brain, is the first book of its kind to explore the insidious role our highly touted low-fat, high- carb diets play in a host of neurological conditions. The vast majority of us don't realize that our seemingly "healthy" daily habits are silently aggravating our nervous systems and setting us up for serious brain ailments. BrainChange shows that the fate of your brain is not in your genes. It's in the food you eat. Dr. Perlmutter, a leading international authority on nutritional medicine, has a disturbing yet empowering message: our brains are highly sensitive to certain proteins and sugars that are ubiquitous today-in our hand creams and organic ice creams, cocktails and coffees, multi-grain breads, whole fruits, and even brand name pharmaceuticals. In BrainChange, he shows us how to prevent, treat, and reverse a wide array of brain-related disorders by eliminating specific foods from our diets and making smarter lifestyle choices. Dr. Perlmutter is the only doctor in the country who is both a board-certified neurologist and a Fellow of the American College of Nutrition, making him uniquely suited to write this book and make this public television program. An in-demand expert for nationally syndicated radio and television programs, he has appeared on 20/20, CNN, Dr. Oz, Fox News, Good Morning America, The Today Show, and Oprah, among many outlets. Dr. Perlmutter also runs his own private practice, The Perlmutter Health Center, in Naples, Florida. (Next Air 08/05/14 09:30pm)

We all have financial issues and problems. Suze Orman's latest special sharply focuses on her helping individual viewers "find financial solutions for you." As always, Suze's advice is based not just on numbers, but on a critical understanding of ourselves and our emotional needs. The special's central theme is that our financial decision-making should be guided by an understanding of "the goal of money." As Suze perceptively defines it: "The goal of money is to make you feel secure." Our financial solutions should work to fulfill that goal. In addition, Suze stresses the importance of making financial decisions that you feel comfortable with. Financial problems are caused when you do things with money that do not seem "right" to you, despite pressures and advice from others. (Next Air 08/10/14 10:00am)

10:00pm T'ai Chi, Health and Happiness with David-Dorian R

T'ai Chi - Health & Happiness is a show that introduces viewers to the practical benefits of the Chinese martial art of T'ai Chi. Respected T'ai Chi expert David-Dorian Ross combines a series of demonstrations that take the viewer through the basics of T'ai Chi with an engaging and detailed description of the physical, mental, and spiritual benefits of this ancient form of exercise and "moving meditation." The show is hosted by the American T'ai Chi champion and advocate David-Dorian Ross - World silver and dual bronze medalist, and 8-time US national champion. He has been called, "a gifted guru," and "the man who brought T'ai Chi mainstream" in the U.S. His television shows, books, seminars and instructional DVD's (including the #1 selling DVD T'ai Chi Beginners' Practice) have already introduced thousands to his down-to-earth, informative and highly personal style of teaching T'ai Chi. Ross is famous for taking this ancient Asian style of Kung-Fu and translating it for modern Western audiences in a way that makes it accessible, fun - and often funny. As David-Dorian explains to the studio and home audience, T'ai Chi is a practice that can transform their lives. It engages the physical body, develops mental focus, and honors ancient wisdom. Its beautiful dance "forms" are practiced by more than a billion people throughout Asia and around the world. T'ai Chi Ch'uan is called "the ultimate exercise" for body, mind and spirit. The health benefits of T'ai Chi are surprising in number and scope, and David-Dorian reviews these in the program. And, as he points out there is an additional and often overlooked benefit to this practice. T'ai Chi is a living philosophy - a practical blueprint for living a life that brings happiness, fulfillment - and that elusive spiritual goal, inner peace. The fundamental lesson behind all of T'ai Chi's benefits can be summed up in one word: balance. In fact, the philosophy of T'ai Chi contends that all of its amazing health benefits come from bringing the person's body, mind and spirit back into balance. The same goes for every other aspect of life - relationships, family, career, self- esteem and creativity. When life is in balance, everything works better. When you begin to lose your balance, the things we want and need in life begin to break down and slip away. As David-Dorian says in the program: "When your life is in balance, everything works. And when your life is out of balance, everything begins to break down. It's just that simple. And that's the essence of tai chi, it's about bringing balance into your life." 7:00pm T'ai Chi, Health and Happiness with David-Dorian R Repeat of 08/09/14 10:00pm

T'ai Chi - Health & Happiness is a show that introduces viewers to the practical benefits of the Chinese martial art of T'ai Chi. Respected T'ai Chi expert David-Dorian Ross combines a series of demonstrations that take the viewer through the basics of T'ai Chi with an engaging and detailed description of the physical, mental, and spiritual benefits of this ancient form of exercise and "moving meditation." The show is hosted by the American T'ai Chi champion and advocate David-Dorian Ross - World silver and dual bronze medalist, and 8-time US national champion. He has been called, "a gifted guru," and "the man who brought T'ai Chi mainstream" in the U.S. His television shows, books, seminars and instructional DVD's (including the #1 selling DVD T'ai Chi Beginners' Practice) have already introduced thousands to his down-to-earth, informative and highly personal style of teaching T'ai Chi. Ross is famous for taking this ancient Asian style of Kung-Fu and translating it for modern Western audiences in a way that makes it accessible, fun - and often funny. As David-Dorian explains to the studio and home audience, T'ai Chi is a practice that can transform their lives. It engages the physical body, develops mental focus, and honors ancient wisdom. Its beautiful dance "forms" are practiced by more than a billion people throughout Asia and around the world. T'ai Chi Ch'uan is called "the ultimate exercise" for body, mind and spirit. The health benefits of T'ai Chi are surprising in number and scope, and David-Dorian reviews these in the program. And, as he points out there is an additional and often overlooked benefit to this practice. T'ai Chi is a living philosophy - a practical blueprint for living a life that brings happiness, fulfillment - and that elusive spiritual goal, inner peace. The fundamental lesson behind all of T'ai Chi's benefits can be summed up in one word: balance. In fact, the philosophy of T'ai Chi contends that all of its amazing health benefits come from bringing the person's body, mind and spirit back into balance. The same goes for every other aspect of life - relationships, family, career, self- esteem and creativity. When life is in balance, everything works better. When you begin to lose your balance, the things we want and need in life begin to break down and slip away. As David-Dorian says in the program: "When your life is in balance, everything works. And when your life is out of balance, everything begins to break down. It's just that simple. And that's the essence of tai chi, it's about bringing balance into your life."

9:00pm Great Performances - Sting: The Last Ship

For the last several years, rock & roll Renaissance man Sting has been working on a new musical play titled "The Last Ship." Featuring new and original music and lyrics by Sting, the project is a collaboration with Tony-winning book writer John Logan ("Red," "Skyfall" screenplay) and will be directed by Tony-winner Joe Mantello of "Wicked." "The Last Ship" opened in Chicago this spring, with a fall 2014 Broadway debut. Exploring a range of universal themes including transgression, redemption and the complexity of relationships over the passage of time, "The Last Ship" tells the story of the demise of the ship building industry in 1980s Newcastle, which for so long had shaped and overshadowed the city's development and community. Having grown up in the literal shadow of the shipyard, Sting was deeply inspired by the subject and has written more than 40 songs for the project. This program is a special concert staging of songs from the musical, performed by Sting and some of the play's cast, recorded in fall 2013 at New York's Public Theater.

11:00pm Woodsongs - Maria Doyle Kennedy and Crystal Bowersox

Maria Doyle Kennedy gained international acclaim for her roles on esteemed films and television series like Dexter, Downton Abbey, and The Tudors. From Ireland, her fifth solo release 'Sing', is a 10-song collection co-written with husband Kieran Kennedy, featuring duets with Damien Rice, Paul Brady and, on 'Yes We Will', the legendary John Prine. Richly imagined, 'Sing' marries folk forms with torch-song melodies, flamenco rhythms, avant-rock, Celtic, Mediterranean and Appalachian airs. Crystal Bowersox catapulted from the coffeehouses and subway tunnels of Chicago to millions of homes across America when she placed second in Season 9 of American Idol by her emotive folk- rock-country style. Old soul voice, care-free style and "don't mess with me" attitude set her apart from the other contestants and landed the self-taught songstress performances with the like Joe Cocker, Harry Connick, Jr., and Alanis Morissette. Her latest is 'All That For This'.

9:00pm Nova - Finding Life Beyond Earth - Part 1 & 2

Scientists are on the verge of answering one of the greatest questions in history: are we alone? Combining the latest telescope images with dazzling CGI, "Finding Life Beyond Earth" immerses audiences in the sights and sounds of alien worlds, while top astrobiologists explain how these places are changing how we think about the potential for life in our solar system. We used to think our neighboring planets and moons were fairly boring -- mostly cold, dead rocks where life could never take hold. Today, however, the solar system looks wilder than we ever imagined. Powerful telescopes and unmanned space missions have revealed a wide range of dynamic environments -- atmospheres thick with organic molecules, active volcanoes, and vast saltwater oceans. This ongoing revolution is forcing scientists to expand their ideas about what kinds of worlds could support life. And if we do find primitive life forms elsewhere in the solar system, it may well be that life is common in the universe -- the rule, and not the exception. (Next Air 08/14/14 02:00am)

With the success of similar artists such as Amy Winehouse or Imelda May, Hill is poised to blaze her own trail in their wake. Her new release is 'Here's Nikki Hill!' Rick Estrin ranks among the very best harp players, singers and songwriters in the blues world. His work on the reeds is deep in the tradition of harmonica masters Sonny Boy Williamson II and Little Walter Jacobs, while at the same time pushing that tradition forward. Rick was awarded the Blues Foundation's prestigious Blues Music Award for Best Harmonica Player at the 34th annual BMA. He will be performing with his band The Nightcats. 9:00pm Nova - Finding Life Beyond Earth - Moons and Beyond

Scientists are on the verge of answering one of the greatest questions in history: are we alone? Combining the latest telescope images with dazzling CGI, "Finding Life Beyond Earth" immerses audiences in the sights and sounds of alien worlds, while top astrobiologists explain how these places are changing how we think about the potential for life in our solar system. We used to think our neighboring planets and moons were fairly boring -- mostly cold, dead rocks where life could never take hold. Today, however, the solar system looks wilder than we ever imagined. Powerful telescopes and unmanned space missions have revealed a wide range of dynamic environments -- atmospheres thick with organic molecules, active volcanoes, and vast saltwater oceans. This ongoing revolution is forcing scientists to expand their ideas about what kinds of worlds could support life. And if we do find primitive life forms elsewhere in the solar system, it may well be that life is common in the universe -- the rule, and not the exception. (Next Air 08/21/14 02:00am)

10:00pm Secrets of the Dead - Lost Ships of Rome

In 2009 a team of marine archeologists, carrying out a sonar survey of the seabed around the remote Italian island of Ventotene, made an astonishing discovery. The wrecks of five ancient Roman ships were found in pristine condition, each one fully laden with exotic goods. Remarkably, much of the cargo remained exactly as the ancient Roman crews had loaded it, suggesting that these ships had not capsized but had gone to the bottom of the sea intact and upright. What happened to these ancient ships? What were they carrying and why had they traveled to this remote, rocky island in the first place? "Lost Ships of Rome" follows the team as they explore the sites in detail, salvage artifacts and piece together the history of the ships and why they were lost at Ventotene 2,000 years ago. 10:30pm Out of Order

Now more than ever, American citizens are discontented and disillusioned with national politics, with approval ratings for Congress consistently ranking low regardless of the party in power. Senior politicians also note the disappearance of the collegiality they once shared with peers of differing political ideologies. As a result, the ability to discuss issues from varying points of view and negotiate solutions, appears to be fading from the American political process. Among many topics, OUT OF ORDER addresses the decline in civil discourse and the news media's role in it, partisan gridlock, gerrymandering, vanishing commitment to reasonable compromise, the vilification of moderates and declining civic engagement. The half-hour documentary relies on interviews with a broad range of political experts and observers from journalists, academics and political strategists to senior elected officials. They include: journalist Bob Schieffer (CBS News), Sen. Mark Warner (D-VA), Sen. Susan Collins (R-MA), Fmr Sen. Evan Bayh (D-IN), Fmr Sen. Alan Simpson (R-WY), Fmr Sen. John Warner (R-VA).

7:00pm Rebels with a Cause

Narrated by Oscar-winning actress Frances McDormand, REBELS WITH A CAUSE spotlights a small group of people who banded together to protect and preserve open spaces near urban areas for parks and farms from rampant development. In doing so, they brought about America's system of national seashores and recreation areas. The film begins in the 1950s and tells the tale of this disparate band of activists who, despite reversals, diversions, and disappointments, persisted in their mission for 20 years. Their cause crosses party lines, unifies seemingly antagonistic foes, falters and is nearly extinguished many times along the way, but is ultimately victorious. REBELS WITH A CAUSE documents a fascinating example of a hard-fought campaign to preserve something important to all Americans - our public lands.

11:00pm Woodsongs - Janiva Magness and Minton Sparks

Janiva Magness is among the premier blues and R&B singers in the world today. Her voice possesses an earthy, raw honesty and beauty born from her life experience. She received the coveted 2009 Blues Music Awards for B.B. King Entertainer Of The Year (she is only the second woman to ever win this award, Koko Taylor being the first). She returns to the WoodSongs stage with a brand new CD 'Stronger For It', where she co-wrote three remarkable, autobiographical songs for the album. Minton Sparks fuses music, poetry, and her intoxicating gift for storytelling to paint word pictures of the rural South that put you square in the middle of the people and the places she knows like the back of her hand. She delivers words in beelines of bluesy rhythm and worries the hooks-and there are hooks-backed solely by the nimble acoustic guitar work of John Jackson, who's perhaps best known for having played with Bob Dylan. Her latest album, 'Live at the Station Inn', captures her and Jackson performing 13 memorable story-songs in front of an audience.
