8:00pm Well Read - Terrance Hayes' How to Be Drawn

In *How to Be Drawn*, his daring fifth collection, Terrance Hayes explores how we see and are seen. While many of these poems bear the clearest imprint yet of Hayes's background as a visual artist, they do not strive to describe art so much as inhabit it. Thus, one poem contemplates the principle of blind contour drawing while others are inspired by maps, graphs, and assorted artists. The formal and emotional versatilities that distinguish Hayes's award-winning poetry are unified by existential focus. Simultaneously complex and transparent, urgent and composed, *How To Be Drawn* is a mesmerizing achievement.

7:30pm California's Gold - Shasta Dam

When most people think of Shasta Lake, they imagine themselves on a houseboat enjoying California's largest manmade reservoir. With 365 miles of shoreline it is a boaters paradise. What most people don't think about is the massive structure that is responsible for holding back the water that creates Shasta Lake. We're talking about Shasta Dam which, is a perfect example of "California's Gold". Construction of the dam started in 1938 and ended in 1945. It's 602 feet high, 883 feet thick at the bottom, 30 feet thick at the top, and 3,460 feet long. The face of the dam is as big as six football fields and the spillway is the largest manmade waterfall in the world - three times the height of Niagara Falls. There are 18 outlets on the face of the dam, each big enough to drive a pickup through. Shasta Dam has the second largest mass of any dam in the United States. In this adventure, Huell and Luis get a behind the scenes look at this engineering marvel. Miles of tunnels and millions of gallons of water make for an exciting day, but there is another aspect to the Shasta Dam - the human element. It is the people who built the dam, the people that poured concrete 24 hours a day for 5 1/2 years and the countless other jobs that make this structure such a gem. Huell meets several of the original dam workers and listens to their stories about the glory days of Shasta Dam.

**8:00pm Brainchange with David Perlmutter, Md
No Promo**

Repeat of 07/26/15 01:30pm

BrainChange reveals the devastating truth about the effects of wheat, sugar, and carbohydrates on the human brain, with a 30-day plan to achieve optimum health. Renowned neurologist David Perlmutter, MD, blows the lid off a topic that's been buried in medical literature for far too long: carbs are destroying your brain. And not just unhealthy carbs, but even healthy ones like whole grains can cause dementia, ADHD, anxiety, chronic headaches, depression, and much more. His New York Times #1 best-selling book, Grain Brain, is the first book of its kind to explore the insidious role our highly touted low-fat, high- carb diets play in a host of neurological conditions. The vast majority of us don't realize that our seemingly "healthy" daily habits are silently aggravating our nervous systems and setting us up for serious brain ailments. BrainChange shows that the fate of your brain is not in your genes. It's in the food you eat. Dr. Perlmutter, a leading international authority on nutritional medicine, has a disturbing yet empowering message: our brains are highly sensitive to certain proteins and sugars that are ubiquitous today-in our hand creams and organic ice creams, cocktails and coffees, multi-grain breads, whole fruits, and even brand name pharmaceuticals. In BrainChange, he shows us how to prevent, treat, and reverse a wide array of brain-related disorders by eliminating specific foods from our diets and making smarter lifestyle choices. Dr. Perlmutter is the only doctor in the country who is both a board-certified neurologist and a Fellow of the American College of Nutrition, making him uniquely suited to write this book and make this public television program. An in-demand expert for nationally syndicated radio and television programs, he has appeared on 20/20, CNN, Dr. Oz, Fox News, Good Morning America, The Today Show, and Oprah, among many outlets. Dr. Perlmutter also runs his own private practice, The Perlmutter Health Center, in Naples, Florida.

When most people think of Shasta Lake, they imagine themselves on a houseboat enjoying California's largest manmade reservoir. With 365 miles of shoreline it is a boaters paradise. What most people don't think about is the massive structure that is responsible for holding back the water that creates Shasta Lake. We're talking about 3,460 feet long and 602 feet high Shasta Dam which, is a perfect example of "California's Gold." Construction of the dam started in 1938 and ended in 1945. The spillway is the largest manmade waterfall in the world - three times the height of Niagara Falls. Shasta Dam has the second largest mass of any dam in the United States. In this adventure, Huell and Luis get a behind the scenes look at this engineering marvel. Miles of tunnels and millions of gallons of water make for an exciting day, but there is another aspect to the Shasta Dam - the human element. It is the people who built the dam, the people that poured concrete 24 hours a day for 5 1/2 years and the countless other jobs that make this structure such a gem. Huell meets several of the original dam workers and listens to their stories about the glory days of Shasta Dam.

For his stag night, Mark wants to camp out in the woods under the stars accompanied by his Best Man, Al Large, but it is not long before the two intrepid campers are lost in the woods. Then an adder bites Mark's ankle and he suffers a potentially fatal allergic reaction. Al has finally flown the nest, and has been busy setting up his first home. The flat needs a lot of work to make it habitable again. While he has been wandering in the woods his dad Bert thought he would try to spruce the place up for him, with disastrous consequences. Meanwhile, it appears the beaches of North Cornwall are being stormed by legions of poisonous fish intent on terrorizing the teenage population of Portwenn. Teenage boys have been lining up for treatment for weever fish stings. Martin is furious to hear that the boys had been playing a deadly game of who could stand the pain of being stung the longest.

10:00pm Jammin at Hippie Jack's - Hayes Carll

Hayes Carll is an odd mix. Wildly literate, utterly slackerly, impossibly romantic, absolutely a slave to the music, the 35-year old Texan is completely committed to the truth and unafraid to skewer pomposity, hypocrisy and small-minded thinking. In a world of shallow and shallower, where it's all groove and gloss, that might seem a hopeless proposition. Last year, "Another Like You," Carll's stereotypes-attract duet of polar opposites, was American Songwriter's #1 Song of 2011 - and KMAG YOYO was the Americana Music Association's #1 Album, as well as making Best of Lists for Rolling Stone, SPIN and a New York Times Critics Choice.

7:00pm California's Gold - Wedding of the Waters

In 1937, an amazing three-day event took place to celebrate the opening of a new road from Lone Pine to Death Valley. A gourd was filled with water from the highest lake in the U.S. on the side of Mt. Whitney. A trip commenced using all modes of important California transportation--Native American runner, Pony Express, miner and burro, 20-mule team, stagecoach, train, car and plane. With many famous participants, the water finally arrived at the lowest lake in the U.S, Bad Water Death Valley, and was poured in, thus consummating the Wedding of the Waters. Join Huell and Luis 60 years later as they recreate this historic event with a few people who were there the first time, many descendants of the original participants and tons of vintage photos and films on this incredible piece of "California's Gold."
