Oscher MUDDY WATERS is an American Icon. The whole story of the blues can be heard, felt, and learned in his life. Country blues were Muddy's roots and remained at his core, but through the force of his artistry he transformed them. With electricity, volume, the weaving of bass and guitar lines with piano, harmonica and drums, he created the ensemble sound and subsequently the template for future Rock and Pop groups including the Beatles and The Rolling Stones. His music's raw power and energy, plus his attitude and magnetism-Muddy was the prototype for the iconic Rock'n Roll star-are still the major ingredients that inspire the popular music we listen to today. 7:30PM California's Gold - Shasta Dam

When most people think of Shasta Lake, they imagine themselves on a houseboat enjoying California's largest manmade reservoir. With 365 miles of shoreline it is a boaters paradise. What most people don't think about is the massive structure that is responsible for holding back the water that creates Shasta Lake. We're talking about Shasta Dam which, is a perfect example of "California's Gold". Construction of the dam started in 1938 and ended in 1945. It's 602 feet high, 883 feet thick at the bottom, 30 feet thick at the top, and 3,460 feet long. The face of the dam is as big as six football fields and the spillway is the largest manmade waterfall in the world - three times the height of Niagara Falls. There are 18 outlets on the face of the dam, each big enough to drive a pickup through. Shasta Dam has the second largest mass of any dam in the United States. In this adventure, Huell and Luis get a behind the scenes look at this engineering marvel. Miles of tunnels and millions of gallons of water make for an exciting day, but there is another aspect to the Shasta Dam - the human element. It is the people who built the dam, the people that poured concrete 24 hours a day for 5 1/2 years and the countless other jobs that make this structure such a gem. Huell meets several of the

7:30PM California's Gold - Flying Fish

Catalina has been famous for many things over the years, Glass BottomBoats, Buffalo and the Casino to name a few. But one of the strangest and most popular attractions has been the Flying Fish Boat Trip which has been transporting visitors on nighttime journeys to watch Catalina's flying fish since the turn of the century. In 1924 William Wrigley decided to build a boat just for Flying Fish Tours. The Blanche W. is a 64-foot long open-deck wooden boat named after Wrigley's granddaughter Blanche. The boat is still outfitted with its original pew-style mahogany benches, which seats 98 passengers. The boat cruises the islands coastline at night, attracting flying fish with two 40-million candle-power W.W.I spotlights. The spectacle of the fish leaping out of the water has been compared to giant silver dragonflies soaring over the ocean. Huell travels back to Catalina for a very special 75th anniversary cruise. William Wrigleys granddaughter Blanche (for whom the boat was named) comes back to the island and shares some wonderful stories with Huell. We'll even take a close up look at a flying fish and
