**9:00pm Space Men: American Experience**

Meet the pioneering Air Force scientists and pilots whose Project Manhigh, which collected data about the biological and technical factors required to support human activity in space, laid the groundwork for the US space program. (Next Air 03/02/16 02:00am)

**10:00pm Frontline - Poor Kids**

These are hard times in the Quad Cities, a great American crossroads along the border of Iowa and Illinois, where the Mississippi River intersects Interstate 80. It's home to John Deere manufacturing and the nation's breadbasket. But it's also an area deeply scarred by the recession. FRONTLINE spent months following three young girls who are growing up against the backdrop of their families' struggles against financial ruin. The result is an intimate portrait of the economic crisis as it's rarely seen, through the eyes of children. At a time when one in five American kids lives below the poverty line, Poor Kids is an unflinching and revealing exploration of what poverty means to children, and to the country's future.

Repeat of 02/24/16 07:30pm

Step back in time with Huell as he visits a weekend gathering of classic teardrop trailers. They sleep two, and have a built-in kitchen on the back all in a teardrop shaped trailer a little more than eight feet long. Some were built by various manufacturers, but many were lovingly built or restored by hand from plans in a Popular Science magazine.

**8:00pm Nature - Invasion of the Killer Whales**

As the ice shrinks in the Arctic, polar bears are struggling to survive in a fast melting world. Although classified a marine mammal, the polar bear is not adapted to hunting in the water. And it is certainly no match for the world's greatest aquatic hunter - the killer whale. In the last few years, scientists have noted an ever-growing number of killer whales in Arctic waters in the summer months. More and more have been attracted to these hunting grounds by the growing expanse of open water. They attack the same prey as the polar bears: seals, narwhal, belugas and bowhead whales. (Next Air 03/04/16 03:00am)

**9:00pm Nova - Arctic Ghost Ship**

Unravel the greatest mystery in Arctic exploration: 160 years ago, the Franklin Expedition to chart the Northwest Passage vanished. Now, a Canadian team discovers one of Franklin's lost ships-a vital clue to the fate of the ill-starred expedition.

**10:00pm Nova - First Man on the Moon**

NOVA presents an intimate portrait of Neil Armstrong, the first person to set foot on the moon, through interviews with Armstrong's family and friends. The film reveals his achievements as a Navy combat veteran and pioneer of high-speed flight. NOVA revisits the final moments of the Apollo 11 landing, when Armstrong brought the Eagle down safely with seconds to spare. But he regretted that he got so much credit for the team effort that the lunar landing represented. In its exploration of this quietly effective man, NOVA explores his achievements following Apollo. This is an inspiring story of heroic risk-taking and humble dedication to advancing humanity's adventure in space. (Next Air 03/03/16 02:00am)

**9:30pm Great Vacation Squeeze**

Americans have the shortest vacations of any rich country. And they are actually getting even shorter. The US is one of only five countries in the world -- the others are Burma, Nepal, Suriname and Guyana -- which have no law guaranteeing any paid vacation time for workers. The average US vacation is a bit over two weeks, while the median is only about a week, and American workers give back about three vacation days every year. Europeans enjoy five or six weeks of vacation each year and are healthier than Americans. Vacations matter - - for productivity, happiness, family bonding and especially, health. Men who don't regularly take vacations are a third more likely to suffer heart attacks than those who do; women are fifty percent more likely, and far more likely to suffer from depression. Making the case for more vacation time are: Shelton Johnson, a ranger naturalist in Yosemite and a "star" of Ken Burns' National Parks series; Rick Steves, the world's best-selling travel writer; and Sara Speck, cardiologist and director of a cardio-vascular wellness program, who tells patients to "take two weeks and call me in the morning." Extra pounds. Wrinkles. Aching joints. Fatigue. When you "hit the wall" between young and old, you think there's no way to escape the downward spiral. Eventually, you start to give up hope. You begin hiding behind the camera instead of posing for it. You get used to looking washed-out and feeling blah. But guess what? You don't need to surrender! You can stay slim, young, and energetic forever. And you don't need pills, injections or surgery. You can do it all with diet. Dr. Kellyann Petrucci, the author of the blockbuster new book Dr. Kellyann's Bone Broth Diet, is a weight loss transformation specialist who's helped thousands of people go from fat, sick, and old to young, slender, and vibrant. In 21 Days To A Slimmer Younger You with Dr. Kellyann, she tells you how to undergo your own life-changing transformation in just 21 days. You'll learn all about the super-foods that renew your cells so you erase wrinkles and become a fat-burning machine. You'll discover the power of bone broth-the "liquid gold" that takes years off your skin and melts pounds off your body. And you'll see how short, painless mini-fasts can take your weight loss to a whole new level. Above all, you'll learn that your best years aren't behind you. They're right ahead of you... and they're only 21 days away. (Next Air 03/20/16 06:30pm)

**11:30pm Great Vacation Squeeze** Repeat of 03/03/16 09:30pm  
 Americans have the shortest vacations of any rich country. And they are actually getting even shorter. The US is one of only five countries in the world -- the others are Burma, Nepal, Suriname and Guyana -- which have no law guaranteeing any paid vacation time for workers. The average US vacation is a bit over two weeks, while the median is only about a week, and American workers give back about three vacation days every year. Europeans enjoy five or six weeks of vacation each year and are healthier than Americans. Vacations matter - - for productivity, happiness, family bonding and especially, health. Men who don't regularly take vacations are a third more likely to suffer heart attacks than those who do; women are fifty percent more likely, and far more likely to suffer from depression. Making the case for more vacation time are: Shelton Johnson, a ranger naturalist in Yosemite and a "star" of Ken Burns' National Parks series; Rick Steves, the world's best-selling travel writer; and Sara Speck, cardiologist and director of a cardio-vascular wellness program, who tells patients to "take two weeks and call me in the morning."

**7:30pm California's Gold - Sub-Net**

It's huge, metal and reaches across the Golden Gate, but it's not a bridge. Join Huell as he visits the site of the WWII antisubmarine net built to keep Japanese subs out of San Francisco. Long before the Tiburon Sub-Net Depot was there, this small piece of land across the bay from San Francisco had many incarnations. Among them were: home to Native Americans, an original Spanish Rancho, the largest Codfish drying plant on the west coast, a coaling station for the Navy, and it was where the cables for the Golden Gate Bridge were spun. In fact, if you look closely at low tide, you can still see them. Come on along with us as we get an up-close look at this little, but important, piece of California's Gold.

**9:30pm Brain Maker with David Perlmutter, Md**

Debilitating brain disorders are on the rise - from children diagnosed with autism and ADHD to adults developing dementia at younger ages than ever before. But a medical revolution is underway that can solve this problem: Astonishing new research is revealing that the health of your brain is, to an extraordinary degree, dictated by the state of your microbiome - the vast population of organisms that live in your body and out -number your own cells ten to one. What's taking place in your intestines today is determining your risk for any number of brain-related conditions. Fresh off his huge public television pledge blockbuster, BrainChange, first released in December 2013, Dr. Perlmutter explains in Brain Maker the potent interplay between intestinal microbes and the brain, describing how the microbiome develops from birth and evolves based on lifestyle choices, how it can become "sick," and how nurturing gut health through a few easy strategies can alter your brain's destiny for the better. With simple dietary recommendations and a highly practical program of five steps to improving gut ecology, Brain Maker opens the door to unprecedented brain health potential.

**11:00pm Masterpiece Mystery! - Grantchester, Part 6**

Huell travels to the 2002 National SPAAMFAA Winter Convention in San Bernardino. SPAAMFAA stands for "Society for the Preservation and Appreciation of Antique Motor Fire Apparatus in America." This get together was a wonderful place to get glimpse of our state's fire- fighting history. There were all kinds of apparatus from small hand pumpers to elaborate steam driven engines from the turn of the century. The highlight of the day was Dave Hubert's lovingly restored rig, the "Reno #1," which served the city of Reno, Nevada from 1902 to 1922. Dave pulled out all the stops and did a "full steam" and a run behind special horses that are trained just for this purpose.

**8:00pm Antiques Roadshow - Boise, Hour One**

ANTIQUES ROADSHOW kicks off season 18 with a treasure-filled visit to Boise, Idaho! During ROADSHOW's first-ever trip to Idaho, host Mark L. Walberg and appraiser Peter J. Shemonsky take a trip to the Egyptian Theatre to look at dazzling Egyptian Revival jewelry. Highlights include a first edition of the Book of Mormon that has been passed down through the guest's family since 1833; a 1955 Madoura plate designed by Picasso that previously hung above the stove, collecting grease; and one of the top finds of the season - an 1858 oil painting by important Hudson River artist Sanford Robinson Gifford, valued at \$3 00,000.

**9:00pm Antiques Roadshow - Boise, Hour Two**

ANTIQUES ROADSHOW is in Idaho, mining the Gem State for hidden treasures! Host Mark L. Walberg and appraiser Gary Piattoni head to the Old Idaho State Penitentiary to discuss what type of law enforcement collectibles should be locked up in the vault. Highlights include a mid-century pinup painting by Earl Moran, whose work rises in value the more scantily clothed the model; a complete set of lobby cards from the 1951 film *The Day the Earth Stood Still*, a film the guest spent nine cents to see in theaters; and an inherited 1922 Edward Hopper etching titled *The Cat Boat*, appraised for \$250,000.

**10:00pm Frontline - Hunting The Nightmare Bacteria**

"Nightmare bacteria." That's how the CDC describes a frightening new threat spreading quickly in hospitals, communities, and across the globe. FRONTLINE reporter David Hoffman investigates the alarming rise of untreatable infections: from a young girl thrust onto life support in an Arizona hospital, to a young American infected in India who comes home to Seattle, and an uncontrollable outbreak at the nation's most prestigious hospital, where 18 patients were mysteriously infected and six died, despite frantic efforts to contain the killer bacteria. Fueled by decades of antibiotic overuse, the crisis has deepened as major drug companies, squeezed by Wall Street expectations, have abandoned the development of new antibiotics. Without swift action, the miracle age of antibiotics could be coming to an end. (Next Air 03/23/16 03:00am)

**8:00pm Nature - Snow Monkeys**

In the frigid valleys of Japan's Shiga Highlands, a troop of snow monkeys make their way and raise their families in a complex society of rank and privilege where each knows their place. Their leader is still new to the job and something of a solitary grouch. But one little monkey, innocently unaware of his own lowly social rank, reaches out to this lonely leader, forming a bond with him that manages over time to warm his less than sunny disposition. It is a rare and remarkable gesture that alters both their lives. Changing seasons bring new babies to care for, a profusion of insects and blossoms to eat, family disagreements to squabble over and tragedies to overcome. Mating season brings competition for females as the days grow shorter and colder in a rush toward winter. But with their now confident leader to guide them and their families to shelter and care for them, this troop of snow monkeys is ready to face the world. (Next Air 03/24/16 01:00am)

**9:00pm Doc Martin - Going Bodmin**

As Martin moves in and meets the locals, he realizes that adjusting to village life is not going to be smooth sailing. In his sharp suits and flashy car, he's a fish out of water. His first patient is Sir Gilbert Spencer, a retired lieutenant colonel, with an embarrassing problem - he's grown breasts. Meanwhile, it's Lifeboat Day in Portwenn, and the harbor is alive with stalls, fairground rides and a jazz band, but Martin has become the butt of jokes among the bevy of teenage girls from the village. Just when he thinks the day couldn't get any worse, Martin is forced off the road and into a ditch on his way out of the village. He's rescued by local police constable, Mark Mylow, who takes him home. But as Martin opens the door, he finds the hall ankle deep in sludgy water. It's the final straw. Martin decides he is not cut out to be a village GP, and decides to tender his resignation. Can any thing or any one change his mind?

**Snow Monkeys**

In the frigid valleys of Japan's Shiga Highlands, a troop of snow monkeys make their way and raise their families in a complex society of rank and privilege where each knows their place. Their leader is still new to the job and something of a solitary grouch. But one little monkey, innocently unaware of his own lowly social rank, reaches out to this lonely leader, forming a bond with him that manages over time to warm his less than sunny disposition. It is a rare and remarkable gesture that alters both their lives. Changing seasons bring new babies to care for, a profusion of insects and blossoms to eat, family disagreements to squabble over and tragedies to overcome. Mating season brings competition for females as the days grow shorter and colder in a rush toward winter. But with their now confident leader to guide them and their families to shelter and care for them, this troop of snow monkeys is ready to face the world.

**8:00pm Secrets of Selfridges**

Two words are synonymous with the department store Selfridges: luxury and London. However, Selfridges was the brain child of an American, Mr. Harry Gordon Selfridge, whose life is depicted in the PBS Masterpiece series "Mr. Selfridge." The real, flamboyant Mr. Selfridge revolutionized the way that Londoners shopped by introducing a new American retail model that made shopping less of a practical pursuit and more of a luxurious adventure. Keen to put the shopper's experience above all else it was Selfridge who coined the phrase "the customer is always right," an expression that has become the mantra of retail stores all over the world. Today, Selfridges remains as much of an attraction as it was when it opened in 1909, and Selfridge's dream of creating a sophisticated and adventurous shopping experience is enjoyed by people from every corner of the world, 362 days a year. This program reveals the grandiose store's hidden stories and delves deep into the mind of its incredibly ambitious creator. (Next Air 03/28/16 01:00am)

**9:00pm Nova - The Great Math Mystery**

NOVA leads viewers on a mathematical mystery tour-a provocative exploration of math's astonishing power across the centuries. We discover math's signature in the swirl of a nautilus shell, the whirlpool of a galaxy, and the spiral in the center of a sunflower. Math was essential to everything from the first wireless radio transmissions to the prediction and discovery of the Higgs boson, and the successful landing of rovers on Mars. But where does math get its power? Astrophysicist and writer Mario Livio, along with a colorful cast of mathematicians, physicists, and engineers, follow math from Pythagoras to Einstein and beyond, all leading to the ultimate riddle: Is math an invention or a discovery? Humankind's clever trick, or the language of the universe? The Great Math Mystery is a show for everyone; whether we think we're good with numbers or not, we all use math in our daily lives. The Great Math Mystery sheds fascinating light on how math works in our brains and ponders the ultimate mystery of why it works so well when decoding the universe. (Next Air 03/31/16 02:00am)
