**11:00pm Woodsongs - Celebration of the Music of Jean Ritchie**

Jean Ritchie is the songwriter many refer to as "The Mother of Folk" and the Princess of Appalachia. She was born in Viper, Kentucky, the youngest of 14 children. Ritchie grew up immersed in the traditional songs of the region and moved to New York in the 1940s where, as a social worker, she taught music to children. She launched the folk movement of the 1960's along with Pete Seeger, Oscar Brand, Woody Guthrie and Alan Lomax. Ritchie's songs have been recorded by a variety of artists including Linda Ronstadt, Emmylou Harris, Johnny Cash and Judy Collins. Over the course of her career, her song collecting and song writing has helped to preserve the musical legacy of her Kentucky home, as well as expand awareness of its challenges through her continued support of the grassroots environmental organization Appalachian Voices and politically pointed songs such as "The L & N" and "Black Waters". Our friends at Compass Records have released a new multi-artist CD in honor of Jean, who now lives in Berea. 'Dear Jean: Artists Celebrates Jean Ritchie' is a double album featuring performances from an impressive array of Ritchie's fans and admirers. Many of these artists performed on this Special Event Broadcast of WoodSongs including: Jon Pickow (traditional folk musicians and Jean's son), Dan Schatz (producer and folksinger), Elizabeth LaPrelle (mastery of the ancient and deep-art of Appalachian unaccompanied singing), Al, Alice and Ruth (from the McLain Family Band) and other surprise guests. It will be an evening of stories, art and music to honor the living legacy of this Kentucky-born singer/songwriter and folk icon.

Meet Lou. Abandoned in a foreclosed home, Lou is one of thousands of parrots in need of rescue. From the wilds of Costa Rica to suburban America, a loveable, quirky cast of parrots reveal their unforgettable tales and the bittersweet world they share with humans. Their outrageous intelligence and uncanny ability to communicate in any language has made parrots one of the world's most popular pets. But unlike dogs and cats, parrots have not been domesticated. Hard wired for the wild, their ear-shattering squawks and unpredictable behavior are designed for the rain forest, not the suburbs. Add a lifespan of 50 plus years to their intense need to bond and a life in captivity often ends in disaster. With shelters and sanctuaries bursting at the seams, too many birds like Lou have no place to go. (Next Air 05/07/15 01:00am)

With state-of-the-art survey gear, Ballard probes the wreck and unravels a dramatic mystery in the official story of the sub's sinking. (Next Air 05/07/15 02:00am)

People come to Yellowstone primarily because of the unusual thermal features and opportunities to view wildlife, often not realizing they are standing on one of the world's largest active volcanoes. This film presents an interpretation of the sweeping geologic story of Yellowstone, from glaciation to mountain-building to the gigantic caldera of a volcano. "Yellowstone: Land to Life" was filmed over two years in all four seasons and delves deeply into the significance behind the scenery. It also explores the bonds between the landscape and biology -- how Yellowstone's geology influences where life exists and how it evolves. The film also contemplates our connection as well: humankind's relationship to Yellowstone, the world's first and most famous national park. (Next Air 05/09/15 04:30am)

**8:00pm Nature - Animal Childhood**

In every animal's life, there comes a time when it must stand on its own two feet, so to speak, and face the world alone. For a few, this happens just moments after birth, with no life lessons from parents to help them, no time to hone their survival skills. Others have the advantage of home schooling under the watchful eye of a mentor or family member. But growing up is never easy, and finding food, avoiding predators and making friends does not always come naturally. These are the trials and tribulations of young animals all over the world as they prepare to leave home. (Next Air 05/14/15 01:00am)

With carbon emissions sharply rising, the silent killer is entering the seas at a staggering rate - raising the oceans' acidity. As a result, the skeletons and shells of marine creatures that form the foundation of the web of life are dissolving. Follow scientists who are seeking solutions and making breakthrough discoveries, including a unique coral garden in Papua New Guinea that offers a glimpse of what the seas could be like in a half-century. Can experts crack the code of a rapidly changing ocean - before it's too late? (Next Air 05/14/15 02:00am)

Join Huell as he rides right through the middle of some California history! First stop is Beal's Cut, a hand-cut stagecoach road in the the Santa Clarita Mountains and a steep "short cut" between the pueblo of Los Angeles and points north. In 1910 the old roadway was replaced by the nearby Newhall Tunnel, which gave way to modern-day Sierra Highway in 1938. Santa Clarita Valley Historian Philip Scorsa tells Huell all there is to know, including how Beal's Cut lived on as a movie location for decades to come. Huell gets a tour with Innkeeper Peggy Mosley and sees the sights, including: "The Iron Door" - known as the oldest continuously operating saloon in the west. Groveland is also the headquarters for the Hetch Hetchy project, and gateway to Yosemite National Park.

Jonathan Wilson-Rader is a budding bluegrass star from Jessamine County. This eight year old has traveled the commonwealth, played with several well-known bluegrass musicians and just completed his first album.
