7:30pm California's Gold - Fire Steamer

Huell travels to the 2002 National SPAAMFAA Winter Convention in San Bernardino. SPAAMFAA stands for "Society for the Preservation and Appreciation of Antique Motor Fire Apparatus in America." This get together was a wonderful place to get glimpse of our state's fire- fighting history. There were all kinds of apparatus from small hand pumpers to elaborate steam driven engines from the turn of the century. The highlight of the day was Dave Hubert's lovingly restored rig, the "Reno #1," which served the city of Reno, Nevada from 1902 to 1922. Dave pulled out all the stops and did a "full steam" and a run behind special horses that are trained just for this purpose.

7:30pm 30 Days to a Younger Heart with Dr. Steven Masley Repeat of 09/27/15 11:00am

Did you know that it's possible to make your heart 10 years younger? Regardless of your body composition, genetics, or age...you can turn back time. And when you do...you will feel healthier, trimmer, fitter, sexier, mentally sharper and better than you have in a decade. Does it sound too good to be true? It isn't... Steven Masley, MD and his three simple steps have helped thousands of patients turn back the clock...and reverse the onset of aging and disease. He is a board- certified physician, nutritionist, longevity researcher and award- winning educator who is also a highly acclaimed chef, trained at the Four Seasons. In "30 Days to a Younger Heart", Dr. Masley shares the surprising news that Metabolic Syndrome, also known as pre-diabetes - not high cholesterol - is the number one cause of cardiovascular disease. Since the term metabolic syndrome is new to most, the doctor describes how easy it is to determine your risk, and why so many Americans have it. Dr. Masley also educates viewers about the dangers of invasive, often unnecessary cardiovascular procedures. His 3 step Heart Tune-Up program is a guide to making lifestyle changes that significantly reduce the likelihood of developing cardiovascular disease. He specifically discusses the impact food, nutrients and exercise have on making a measurable difference in the reduction of arterial plaque. Discover five new categories of heart-healing foods, learn how the amount of time you exercise isn't as important as you may think plus ensure you receive the five key nutrients many lack but are truly necessary for a younger heart. No matter how old you are, or how much you weigh or even the health battle you are facing, no one has to be on a one-way street to aging and disability. Patients' lives every day have been saved and transformed with this heart tune-up program that explores the three easy lifestyle corrections that can take 10 years off of your heart's age in just 30 Days. 7:30pm California's Golden Parks - California Coastal National Monument

In this adventure, Huell visits the California Coastal National Monument which runs the entire length of the California coast (1,100 miles) between Oregon and Mexico, extends 12 nautical miles from the shoreline, and encompasses thousands of BLM administered islands, rocks, exposed reefs, and pinnacles above mean high tide. Cooperatively managed with other federal, state, local government, universities, and private interests, the primary purpose of the Monument is to protect important biological and geological values. The islands, rocks, reefs, and pinnacles provide forage and breeding grounds for significant populations of birds and sea mammals.

8:00pm Nature - Big Birds Can't Fly

This is the unique story of flightless birds. They say a bird is three things - feathers, flight and song. But what happens when you're a bird who can't fly, who can't sing, and whose feathers are closer to fluff? Is this an evolutionary joke? Flightless birds include ostriches, emus, rheas, cassowaries and kiwis, and, interestingly, all have evolved independent of each other on different continents. Research has shown that some of these big birds at one time could fly, but once the dinosaurs were wiped out, these same birds no longer needed to take flight from their enemies. As they began to explore a world rich with food and free from predators, they grew fat, and their legs grew long and strong - until the day they discovered that although they had become good at walking, they'd also become too heavy to fly.

9:00pm Nova - Secrets of Noah's Ark

A 3,700-year-old inscribed clay tablet reveals a surprising new version of the Biblical flood story, complete with how-to instructions for assembling an ark. Following the directions, expert boat builders assemble and launch a massive reed boat.

10:00pm Nova - Petra - Lost City of Stone

More than two thousand years ago, the thriving city of Petra rose up in the bone-dry desert of what is now Jordan. An oasis of culture and abundance, the city was built by wealthy merchants whose camel caravans transported incense and spices across hundreds of miles from the Arabian Gulf. They carved spectacular temple-tombs into its soaring cliffs, raised a monumental Great Temple at its heart, and devised an ingenious system that channeled water to vineyards, bathhouses, fountains, and pools. But following a catastrophic earthquake and a slump in its desert trade routes, Petra's unique culture faded and was lost to most of the world for nearly a thousand years. Now, in a daring experiment, an archaeologist and sculptors team up to carve an iconic temple-tomb to find out how the ancient people of Petra built their city of stone. And beyond Petra's city of the dead, scientists using remote sensors and hydraulic flumes discover a city of the living-complete with a water system that not only supplied 30,000 people with enough to drink, but also filled bathhouses, fountains, and pools with such abundance that some scholars believe this desert metropolis may have been the Las Vegas of the ancient world. The race is on to discover how these nomads created this oasis of culture in one of the harshest climates on earth, and ultimately, why Petra disappeared. (Next Air 10/08/15 03:00am)

The Hearst Ranch began with the first purchase of land by George Hearst in 1865 and is the largest privately owned working cattle ranch on the California coast. Now, through a historic conservation plan, at least 18 miles of coastline including close to 1,500 acres will be available for use by all Californians. Huell hears about the future of the ranch, and how all Californians will be able to enjoy its scenic vistas and learn about this critical wildlife habitat.

8:00pm Nature - Soul of the Elephant

Ironically, every dead elephant with its ivory intact is a reason to celebrate. It means an elephant died of natural causes, not bullets, snares or poison, and a soul was allowed to be celebrated and mourned by its herd. Award-winning filmmakers, Dereck and Beverly Joubert start with the remains of two bull elephants and through a series of key flashbacks, look at the lives they would have led, the dramas they may have seen, their great migrations for water with their families, and their encounters with lions and hyenas. This film, shot over two years, will be an intimate look at elephants through the lens of perhaps the greatest storytellers of natural history.

With pliers in hand, Nebraska artist Emery Blagdon fashioned pieces of wire into patterns and attached foil, beads, ribbons and cast-off items. He hung the creations in his rural Nebraska shed, creating an environment he believed could generate natural energy from the earth and heal the sick. When he died, friends of the man who wore unkempt hair, a long beard and overalls found a way to save his creations. This program tells the story of this visionary artist, his work and its preservation and placement in Wisconsin's prestigious John Michael Kohler Art Center. (Next Air 10/17/15 04:30am)

9:00pm Nova - Sinkholes - Buried Alive

In Tampa, Florida, in February 2013, a giant hole in the ground opened up and swallowed half a house, killing 36 year-old Jeffrey Bush as he slept in his bedroom. A month later, a golfer in Illinois survived an 18-foot fall when the 14th hole caved in beneath his feet. Both were victims of sinkholes-a notorious worldwide hazard that lurks wherever limestone bedrock is found. When carbon dioxide dissolves in rainwater, it forms a weak acid that attacks the soft limestone, riddling it like Swiss cheese with hidden underground rivers, caves and hollows. While this process of erosion takes millions of years, the fragile roof of a cavern near the surface can collapse in an eye blink, with little or no advance warning. Sinkholes can range from a few meters across to one in Egypt that measures 50 x 75 miles, and a Chinese hole nearly half a mile deep. Filled with compelling eyewitness video of collapsing sinkholes and authoritative science from expert geologists, NOVA investigates what it's like to have your world vanish beneath your feet.

Huell visits the former Carlsbad ranch of movie star and California icon Leo Carrillo.

8:00pm War of the Worlds: American Experience

With the CBS radio broadcast of Orson Welles' "War of the Worlds" serving as its narrative spine, the film examines the elements that together created one of the biggest mass hysteria events in U.S. history. Public outcry, forever immortalized in thousands of letters written to CBS, the FCC and Mr. Welles himself, are dramatized in on-camera interviews, bringing to life the people who listened that night to the broadcast and thought it was either awfully good fun or the end of the world.

9:00pm Secrets of the Dead - Vampire Legend

Follow scientists as they uncover "deviant" burials dating back to medieval England, pointing to a belief that the dead could rise from their graves. Predating Eastern European legend, these discoveries force a re-examination of modern vampire lore.

10:00pm Frontline - Inside Assad's Syria

Join correspondent Martin Smith in Syria as he reports from government-controlled areas while the war rages. With on-the-ground reporting and firsthand accounts from Syrians caught in the crisis, the film shines new light on the ongoing conflict. (Next Air 10/28/15 03:00am)

7:30pm California's Golden Parks - China Camp

Huell visits one of our state's most scenic and important State Parks. China Camp State Park is located right on San Francisco Bay and is the last remaining example of the numerous Chinese fishing villages that once dotted the shoreline. Not only does he walk through the quaint village and learn about its colorful history, but he sails out on the Bay in a recently constructed replica of an early Chinese junk. History is so fragile and this is a fine example of how we are preserving it for further generations.

8:00pm Nature - Pets: Wild at Heart: Secretive Creature

In a program packed with incredible filming techniques, from Schlieren photography that makes smells visible, to moving X-rays, ultra slow-motion, and ultraviolet vision as well as HD horsecams and doggycams, discover how our pets experience the world through their astonishing senses and hidden channels of communication. Includes the sensory secrets of budgies, horses, guinea pigs and goldfish as well as the remarkable abilities of hamsters, cats and dogs.
