**9:00pm Frontline - The Man Who Knew**

On the tenth anniversary of the tragic events of September 11, FRONTLINE rebroadcasts the extraordinary saga of FBI special agent John O'Neill. As the bureau's top counterterrorism agent, O'Neill - who investigated the bombings of the U.S. embassies in Africa and the attack on the USS Cole - joined then national security counterterrorism co-coordinator Richard Clarke in believing that the United States should kill Osama bin Laden before Al Qaeda launched a devastating attack on America. Richard Clarke, then speaking in his first major interview, talks about O'Neill's battles with the FBI top brass who found O'Neill's James Bond style an anathema. Forced out of the job he loved, O'Neill took a new position in the private sector - as head of security at the World Trade Center, where he was killed on September 11. The story of O'Neill's life and death provides a rare glimpse inside the FBI and helps answer the question: What did the government know? (Next Air 09/07/16 02:00am)

**7:30pm California's Gold - Shasta Dam**

When most people think of Shasta Lake, they imagine themselves on a houseboat enjoying California's largest manmade reservoir. With 365 miles of shoreline it is a boaters paradise. What most people don't think about is the massive structure that is responsible for holding back the water that creates Shasta Lake. We're talking about Shasta Dam which, is a perfect example of "California's Gold". Construction of the dam started in 1938 and ended in 1945. It's 602 feet high, 883 feet thick at the bottom, 30 feet thick at the top, and 3,460 feet long. The face of the dam is as big as six football fields and the spillway is the largest manmade waterfall in the world - three times the height of Niagara Falls. There are 18 outlets on the face of the dam, each big enough to drive a pickup through. Shasta Dam has the second largest mass of any dam in the United States. In this adventure, Huell and Luis get a behind the scenes look at this engineering marvel. Miles of tunnels and millions of gallons of water make for an exciting day, but there is another aspect to the Shasta Dam - the human element. It is the people who built the dam, the people that poured concrete 24 hours a day for 5 1/2 years and the countless other jobs that make this structure such a gem. Huell meets several of the original dam workers and listens to their stories about the glory days of Shasta Dam.

**9:00pm Nova - Sinkholes - Buried Alive**

In Tampa, Florida, in February 2013, a giant hole in the ground opened up and swallowed half a house, killing 36 year-old Jeffrey Bush as he slept in his bedroom. A month later, a golfer in Illinois survived an 18-foot fall when the 14th hole caved in beneath his feet. Both were victims of sinkholes-a notorious worldwide hazard that lurks wherever limestone bedrock is found. When carbon dioxide dissolves in rainwater, it forms a weak acid that attacks the soft limestone, riddling it like Swiss cheese with hidden underground rivers, caves and hollows. While this process of erosion takes millions of years, the fragile roof of a cavern near the surface can collapse in an eye blink, with little or no advance warning. Sinkholes can range from a few meters across to one in Egypt that measures 50 x 75 miles, and a Chinese hole nearly half a mile deep. Filled with compelling eyewitness video of collapsing sinkholes and authoritative science from expert geologists, NOVA investigates what it's like to have your world vanish beneath your feet. (Next Air 09/08/16 02:00am)

**10:00pm Operation Maneater - Great White Shark**

Mark Evans travels to Western Australia, where seven people have been killed by sharks in the last three years. Authorities have implemented radical measures to catch and kill any shark they deem a threat. Evans wants to find non-lethal solutions to keep people - and sharks - safe. He enters the water to attach tracking tags to great whites; joins beach patrol teams searching for sharks; and tests a new "multi-spectral" camera that spots sharks from the air even when they are hidden several meters underwater. Rejected by the status quo and embattled to defend his futuristic, yet naturalistic visions, an anti-establishment architect finds unexpected allies in the small town where he hopes to build his architectural fantasia. "TELOS" chronicles the unorthodox life and revolutionary work of Eugene Tssui, an eccentric visionary and a maverick architect. He questions traditional building standards and put nature and the environment at the forefront of his designs long before "green" and "eco-friendly" became buzzwords.

**11:00pm Woodsongs - The Mavericks/Whitney Rose**

The Mavericks merge traditional country with traditional rock & roll. The band became one of the most critically acclaimed and commercially successful groups of the early '90s. Raul Malo remains the lead singer of the band, his voice easily navigating country, rockabilly, Latino and even opera. The legendary group has released a brand new album called Mono. Whitney Rose is a special guest on the show as requested by Raul Malo himself, who produced her new album Heartbreaker of the Year. Whitney is a powerful Canadian artist who first met the Mavericks when she was booked to open for them in Toronto, and they were suitably impressed enough to ask her to join them for their entire 2014 cross-Canada tour.

**7:30pm California's Gold - Flying Fish**

Catalina has been famous for many things over the years, Glass BottomBoats, Buffalo and the Casino to name a few. But one of the strangest and most popular attractions has been the Flying Fish Boat Trip which has been transporting visitors on nighttime journeys to watch Catalina's flying fish since the turn of the century. In 1924 William Wrigley decided to build a boat just for Flying Fish Tours. The Blanche W. is a 64-foot long open-deck wooden boat named after Wrigley's granddaughter Blanche. The boat is still outfitted with its original pew-style mahogany benches, which seats 98 passengers. The boat cruises the islands coastline at night, attracting flying fish with two 40-million candle-power W.W.I spotlights. The spectacle of the fish leaping out of the water has been compared to giant silver dragonflies soaring over the ocean. Huell travels back to Catalina for a very special 75th anniversary cruise. William Wrigleys granddaughter Blanche (for whom the boat was named) comes back to the island and shares some wonderful stories with Huell. We'll even take a close up look at a flying fish and enjoy a wonderful night on the sea.

The way children travel to school structures daily life for families around the world-but the means differs dramatically. In Japan 98 percent of children walk to school every day, unaccompanied by a parent. In the United States just 13 percent of children walk or bike to school, and most are driven to school by a parent. The Slow Way Home explores this divergence, examining how American families have largely given up on keeping our streets and public spaces safe enough for children, while Japanese communities have mobilized to keep their streets safe and walkable, not only for children but for everyone in society. Seen through both a historical and contemporary framing, The Slow Way Home is an uplifting examination of differences in culture that provides both insight into a distressing trend in American society and simultaneously offers hope for change.

Tom Paxton is a legendary singer/songwriter. Paxton headed to Greenwich Village in the early '60s, just in time to join Bob Dylan, Dave Van Ronk, Joan Baez and other troubadours who took over coffeehouse stages - and took on the world. Paxton has been raising his rich voice in song ever since, carrying on the folk tradition with passion, wit and grace. He is considered one of the great songwriters of the last century and will be reckoned as one of the greats in this new century, as well. He's celebrating the release of his 62nd (or so) album, *Redemption Road*. Sam Gleaves was raised in Wythe County in southwest Virginia, where he has sung his entire life. Sam's performances combine traditional ballads, dance tunes, original songs and the stories that surround the music. Sam earned a degree in Folklore from Berea College and has performed throughout the United States and internationally. He's released a debut album of contemporary Appalachian songs called *Ain't We Brothers*.

**11:00pm Woodsongs - Celebrating The Legacy of the Carter Family**

The Carter Family are considered the most influential group in country music history. Comprised of a gaunt, shy gospel quartet member named Alvin P. Carter and two reserved country girls -- his wife, Sara, and their sister-in-law, Maybelle -- the Carter Family sang a pure, simple harmony that influenced not only the numerous other family groups of the '30s and the '40s, but folk, bluegrass, and rock musicians like Woody Guthrie, Bill Monroe, the Kingston Trio, Doc Watson, Bob Dylan, and Emmylou Harris, to mention just a few. Among the more than 300 sides they recorded are "Worried Man Blues," "Wabash Cannonball," "Will the Circle Be Unbroken," "Wildwood Flower," and "Keep on the Sunny Side." This WoodSongs Special Event Broadcast will be celebrating the Legacy of the Carter Family and will feature: John Carter Cash has been involved in music all his life and is an accomplished and award winning record producer. However, his activities in the creative world reach far beyond just music production. He is also a singer-songwriter, and author. The grandson of Maybelle Carter and the only son to Johnny Cash and June Carter Cash, he preserves the family legacy and is a caretaker to the heritage of his musical ancestors. Dale Jett is a native of Southwest Virginia and is a third generation member of the legendary Carter Family. The son of Janette Carter, the grandson of A.P. and Sara Carter, his roots have been heavily steeped within the heart of his family's musical heritage. Their group, "Hello Stranger", features Dale as he carries on the Carter Family tradition. Al, Alice & Ruth are a Berea-based Appalachian and bluegrass trio. They toured for years as part of the McLain Family Band, a world-renowned family bluegrass band and Kentucky musical treasure.

**7:30pm California's Gold - Blue Angels**

They're one of the most famous air squadrons in the world -- serving as positive role models and goodwill ambassadors not only for our Navy, but for our country. We're talking about the Blue Angels who, since first formed in 1946, have been demonstrating their flying skills and maneuvers to literally millions of spectators each year. And for over 30 years the Blue Angels have been a part of "California's Gold." Since 1967 the squadron has spent the winter at Naval Air Facility, El Centro, training pilots and new crew members. The good weather and open spaces make this a perfect place to practice and, over the years, squadron members have become a welcome part of the community in Imperial County during their three months of intensive preparation for the 70 air shows they fly each season. On this particular adventure host Huell Howser accepts an invitation to spend a couple of days with the Blue Angels and ends up not only watching them train, but actually gets to go up with them in an F/A18 Hornet for the ride of a lifetime. Huell also meets former Blue Angel pilots who talk about the "good old days," and visits with local citizens who talk about the pride the community of El Centro feels in having the squadron there each winter. All in all, it's a fast-paced, high-powered, high altitude adventure in search of "California's Gold."
