Blue Angels**

Repeat of 09/27/16 07:30pm

They're one of the most famous air squadrons in the world -- serving as positive role models and goodwill ambassadors not only for our Navy, but for our country. We're talking about the Blue Angels who, since first formed in 1946, have been demonstrating their flying skills and maneuvers to literally millions of spectators each year. And for over 30 years the Blue Angels have been a part of "California's Gold." Since 1967 the squadron has spent the winter at Naval Air Facility, El Centro, training pilots and new crew members. The good weather and open spaces make this a perfect place to practice and, over the years, squadron members have become a welcome part of the community in Imperial County during their three months of intensive preparation for the 70 air shows they fly each season. On this particular adventure host Huell Howser accepts an invitation to spend a couple of days with the Blue Angels and ends up not only watching them train, but actually gets to go up with them in an F/A18 Hornet for the ride of a lifetime. Huell also meets former Blue Angel pilots who talk about the "good old days," and visits with local citizens who talk about the pride the community of El Centro feels in having the squadron there each winter. All in all, it's a fast-paced, high-powered, high altitude adventure in search of "California's Gold."

**7:30pm California's Gold - Shasta Dam**

When most people think of Shasta Lake, they imagine themselves on a houseboat enjoying California's largest manmade reservoir. With 365 miles of shoreline it is a boaters paradise. What most people don't think about is the massive structure that is responsible for holding back the water that creates Shasta Lake. We're talking about Shasta Dam which, is a perfect example of "California's Gold". Construction of the dam started in 1938 and ended in 1945. It's 602 feet high, 883 feet thick at the bottom, 30 feet thick at the top, and 3,460 feet long. The face of the dam is as big as six football fields and the spillway is the largest manmade waterfall in the world - three times the height of Niagara Falls. There are 18 outlets on the face of the dam, each big enough to drive a pickup through. Shasta Dam has the second largest mass of any dam in the United States. In this adventure, Huell and Luis get a behind the scenes look at this engineering marvel. Miles of tunnels and millions of gallons of water make for an exciting day, but there is another aspect to the Shasta Dam - the human element. Huell meets several of the original dam workers and listens to their stories about the glory days of Shasta Dam.

He has won countless awards during his legendary career including induction into the Blues Hall of Fame and collaborated with innumerable musical giants of the past 50 years including Howlin' Wolf, Muddy Waters, Big Joe Williams, Little Walter, Sonny Boy Williamson, Tom Waits, Eddie Vedder and Ben Harper, just to name a few. His latest I Ain't Lyin' is all Charlie - original tunes penned by this Grammy winning master that resonate with the South itself. Gill Landry is a songwriter and multi-instrumentalist from Louisiana. After cutting his musical teeth busking in New Orleans and chewing up half of America, he started writing on guitar, banjo, pedal steel, and been a contributing songwriter in Old Crow Medicine Show since 2004. Although Gill's music is influenced by some of the same sources as Old Crow, from Dylan to old delta blues songsters, his music is very much his own. Gill's self titled third album is his first on the ATO label.

**9:00pm Nova - Sinkholes - Buried Alive**

In Tampa, Florida, in February 2013, a giant hole in the ground opened up and swallowed half a house, killing 36 year-old Jeffrey Bush as he slept in his bedroom. A month later, a golfer in Illinois survived an 18-foot fall when the 14th hole caved in beneath his feet. Both were victims of sinkholes—a notorious worldwide hazard that lurks wherever limestone bedrock is found. When carbon dioxide dissolves in rainwater, it forms a weak acid that attacks the soft limestone, riddling it like Swiss cheese with hidden underground rivers, caves and hollows. While this process of erosion takes millions of years, the fragile roof of a cavern near the surface can collapse in an eye blink, with little or no advance warning. Sinkholes can range from a few meters across to one in Egypt that measures 50 x 75 miles, and a Chinese hole nearly half a mile deep. Filled with compelling eyewitness video of collapsing sinkholes and authoritative science from expert geologists, NOVA investigates what it's like to have your world vanish beneath your feet.

Repeat of 10/28/16 04:30pm

The documentary AMERICAN REDS provides a historical overview of 20th century Communism and the growth, decline and contemporary relevance of the Communist Party, USA (CPUSA). Since its founding in 1919, the CPUSA has championed the struggles for democracy, labor rights, women's equality, and racial justice. During its heyday in the 1930s and 1940s, it attracted millions of Americans to support its causes and almost 100,000 men and women to enlist in its ranks. The film begins with the Party's emergence as a small militant sect in the 1920 s and documents its rise to the foremost radical group in the United States during the Great Depression, fighting against racism, sexism and fascism, as well as for the rights of workers to organize. It ends with the decline of the Party during the Cold War under the assaults of the FBI and anti-communist crusades. Through powerful and compelling personal stories told by current and former members of the Party, along with commentary from historians and academics, AMERICAN REDS explores the organization's complex and contradictory efforts to realize its vision of creating a radiant society based on freedom, equality, justice and fraternity. **9:00pm Trilogy of Terror: Theater of the Mind**

KTWU's Theatre of the Mind presents an all-new production in the style of a 1940's radio play. Based on three classic stories and adapted by playwright Philip Grecian. "The Fall of the House of Usher" by Edgar Allan Poe; "The Legend of Sleepy Hollow" by Washington Irving; "The Cats of Ulthar" by H. P. Lovecraft. As has been the custom with these dramas, the actors often play multiple roles and employ vintage microphones to simulate radio's Golden Age with live physical sound effects. They portray period radio performers, and so the haunted presence of Poe's House of Usher, the hoofbeats of the Headless Horseman and the horrific fantasy with felines is created through "theater of the mind" in the imagination of the listening audience.
